Vol. XLIX] No 11 - E. J. POLLARD, Editor and Proprietor.

NAPANEE, ONT., CANADA

McPHERSON SHOES!

You will find us ready at any time to do you a lot of good for your shoe money. This is the place where the money you spend represents more good results to you than any other. We are demonstrating value here in McPherson Shoes. They show you how good it is possible to make shoes. You will be amazed at

The Excellent Quality,
The Unusual Styles,
The Great Assortment.

They are as good as they look, and better than they cost. We fit them so that you will take pleasure in wearing them.

The balance of our Mitts and Gloves to go at less than cost.

ROYAL SHOE STORE, Napanee, Ontario
S. G. HAWLEY, Manager.

The Cheapest Piano

is always the one that gives the most value for the money invested.

THE NORDHEIMER PIANO

is shown at our warerooms, and we ask all intending purchasers to come and inspect before buying.

HARDWOOD FLOORS are easily marred, but we have a perfect new Castor which prevents furniture from marking or injuring hardwood floors.

Don't forget our Electric Table Lamps. They add wonderfully to the cosey den or sitting room.

Gibbard Furniture Co' y.
Limited.
Napanee.

WALLPAPER ! HOMES

TOWN COUNCIL.

Council Chambers,
February 21st, 1910.

Council met in regular session on Monday evening. Mayor T. W. Simpson, presiding. Present—Reeve Alexander, Councillors Osborne, Waller, Hawley, Kimmerly, Steacy. The minutes of the last regular session were read and confirmed.

Mr. S. R. Miller, Chairman of the Board of Education, appeared before the Council and asked for a statement, according to the census taken by the Assessor, of the number of children in Napanee between the ages of eight and fourteen. It was necessary that the Board of Education have this information in order that they might make their report to the Department. There were also a number of children in town between these ages who were not attending school, and the information asked for would assist the Board in its investigations.

The Clerk informed the Council that, according to the Assessor's census, the number of children was 364.

Mr. C. H. Edwards, Principal of the Public School, stated there certainly must be some mistake, as he had the names of 488 enrolled on his register. There was probably one hundred of these below the age of eight, and about twelve over fourteen, and that left a discrepancy of twelve.

Considerable discussion took place as to the best means of ascertaining the facts and giving them proper attention, and on motion of Councillors Waller and Osborne, it was decided that the Police Committee, together with the Trustee Officer, select a committee from the Board of Education and inquire into the matter.

A communication was received from Allan Neilson, applying for the position of Assessor for 1910. Laid on the table.

The following requisition from the Board of Education for money for school purposes was placed before the Council:

PUBLIC SCHOOL.

	Estimated Expenditure.
Salaries	\$5223 00
Fuel	400 00
Insurance	50 00
Maps, etc.	25 00
Printing and Stationery	15 00

Legislative grant	\$1290 00
" (Cadet Corps)	50 00
Fees	60 00
County proportion	3500 00
Town proportion	4000 00
	\$8900 00

Laid on the table.

The Printing and By-law Committee presented a written opinion from the Town Solicitor in reference to the Local Improvement By-law. The Solicitor informed them of a way they might get over the difficulty raised by some one individual in a block who refuses to pay part of the cost of a cement walk, while all other property-owners in the block desire to have one built and where, in the opinion of the Council, it is in the public interests that one should be built. There is a section of The Municipal Act framed to meet just such a case as this. Section 677 expressly provides that if, in the opinion of two-thirds of the members of the Council, it is desirable in the public interests to construct and lay down a sidewalk or pavement, the same be done and the costs thereof may be assessed against the properties fronting or abutting thereon.

The Committee also reported, that owing to The Municipal Act being so cumbersome regarding sewers and sidewalks, they deemed it not advisable to enact a Local Improvement By-law at the present time.

They also recommended that the Town Solicitor draft an agreement between the town and parties petitioning for cement walks and that said agreement be signed

LETTER TO THE EDITOR.

MR. EDITOR,—

I crave the privilege of using a small space of your valuable paper this week. While reading my daily paper on Tuesday last, I ran across the following item which immediately appealed to me as an idea which is bound to bear fruit, especially as there must be enthusiasm and energy behind the project.

"The Peterboro Board of Trade has undertaken to raise \$2000 by subscription to maintain a Commissioner of Industry of the city. If the Board raises \$2000, the city council will make a grant of \$2000. Peterboro intends making a big effort to secure factories this year."

Now, Mr. Editor, why should not a similar scheme work in the good old town of Napanee. It is not as though we were isolated in some out of the way place where shipping facilities, and other things necessary for a good location, were not to be had. Instead we are located upon the main line of the G. T. R., and the B. Q. R., which connects with the C. P. R. and we also have easy access to transportation by water. As for proper sites for the establishment of industries Napanee simply abounds with some of the choicest. All that is needed is that the fact be advertised, that the influential citizens take an interest in it, and particularly the officials of the town. Let everybody put their shoulder to the wheel and then watch Napanee grow.

I have heard the suggestion that the town's property on the west side of Centre street could be used as an inducement for a free site for some industry, which might be induced to locate here. This of course is only a suggestion, but well worthy of a thought.

The probability is that the rate for the year 1910 will be about twenty-five mills. At any rate, for arguments sake, we will say that is the rate, then how would it be if the council would add two mills more to be used solely for advertising our beautiful town, and in endeavoring to induce industries to locate here.

Now, Mr. Editor, the above is only my humble opinion and I hope your many readers will not proceed to "knock" the question, but rather give it reasonable consideration, and discuss the matter among their friends. What Napanee really needs is "boosters" not "knockers" and any effort, no matter how insignificant should be helped along instead of being ridiculed. I would like to hear the opinion of any other citizen along this line through the columns of your paper.

Thanking you for the space used in publishing this, I remain,

A NAPANEAN.

ENTERPRISE.

We are having beautiful winter weather: the farmers are taking advantage of it hauling up their wood.

William Clark and son, Marshall, Dresden, are spending a few weeks with friends around here.

On Wednesday, 16th Feb., a number of the friends of Mr. and Mrs. Robert Potter assembled at their home and presented them with a kitchen shower. There was a long list of presents.

FAIR VIEW

The roads are in bad condition with pitch holes.

Herbert Free bought a fine horse from Herbert Loys.

Stanley Vassalton attended the fun-

Portable

Band Saw Mill !

Breeze & Dennison are erecting a Portable Band Saw Mill in the Village of Newburgh, which will be in operation in a couple of weeks.

From 20 to 25 per cent. more lumber is produced by this process than by the circular saw.

Parties having logs to cut are invited to give them a trial.

CHAS. WALKER,

Operator and Manager.

4-2m

T. A. Huffman, Druggist,

and—

Wallace's Drug Store

Another preparation sold for a great many years by Mr. Huffman is

Warner's
Asthma Remedy.

and it enjoys a larger sale around here than all other Asthma Remedies combined—of course there's a reason for it. First, it is as good as the best one and better than most of the others; secondly, for 25c you get a package as large as Kellogg's or Schiffman's dollar size.

Sold now at Wallace's Drug Store.

Anything you have been in the habit of getting at Huffman's you can now obtain at WALLACE'S.

All medicines advertised in this newspaper are sold at Wallace's Red Cross Drug Store, Napanee. No matter what other stores advertise the price at Wallace's is as low in all cases and lower in some.

in our opinion or to whom or to the members of the Council, it is desirable in the public interests to construct and lay down a sidewalk or pavement, the same be done and the costs thereof may be assessed against the properties fronting or abutting thereon.

The Committee also reported, that owing to The Municipal Act being so cumbersome regarding sewers and sidewalks, they deemed it not advisable to enact a Local Improvement By-Law at the present time.

They also recommended that the Town Solicitor draft an agreement between the town and parties petitioning for cement walks, and that said agreement be signed by the parties before work on the said walk is begun.

On motion of Councillors Waller and Kimmerly, the Clerk was authorized to prepare a resolution to be forwarded to the Minister of Public Works, requesting that the dial on the town clock at the postoffice be illuminated.

The time for the return of the Collector's roll was extended until the next meeting of the Council.

The following accounts were ordered paid: Wilson Bros., \$14.60; F. E. Vanluven \$21.60.

At the previous meeting of the Council some of the members asked for information as to the amount of insurance carried on town property. The Clerk supplied the said information, which is as follows:—

Property occupied by Mr. Stevens, \$600; Town Hall and contents, \$1,600; property occupied by Chas. Anderson, \$800; fire hall, fire engine, \$1,000; public library building, \$2,000.

Council adjourned.

Washing Machines, Clothes Baskets, Clothes Pins, Clothes Lines, Clothes Hampers, large variety at

BOYLE & SONS

BELL ROCK.

According to latest reports the surveyors of the C.N.R.R. are still hovering around the woody maze of the drownd land.

Last Thursday night, W. Forrester held a meeting here in the interest of the Northern Electric Telephone company.

W. Brooks has sold his black team at a fancy price.

S. R. Pomeroy spent a day in Kingston last week.

J. Pomeroy and E. L. Aimey made a flying trip to Newburgh on Thursday.

Frank Snider, Violet, is at Frederick Snider's.

ERINVILLE.

The funeral of the late Hugh Cunningham took place on Saturday morning from the Roman Catholic church. The remains were placed in the vault. Mr. Cunningham was a highly respected resident, and leaves a wife and two small children.

J. D. McDonald, of the McDonald Rowland Lumber company, Owen Sound, is here shipping lumber purchased some time ago from S. Bowerman, Clair View.

The remains of the infant child of Mr. and Mrs. W. Burns were placed in the vault here Tuesday.

J. E. Murphy spent the last few days auditing books for the township council in Tamworth.

The agent for the Cooper Lumber company has purchased a large quantity of timber from J. J. Neville.

Thomas Evans shipped six carloads of wood to Kingston recently.

The Murphy property here has been purchased by M. J. Hopkins, Rockport.

Miss Mary Byrnes has returned after a two weeks' visit to friends in Belleville.

Mr. LeFeabre, Montreal, has donated a statue to the Roman Catholic church here.

Mrs. Thomas Evans spent the past week in Madoc.

Mr. Bennett, of Kingston, has purchased a quantity of lumber, wood and shingles throughout this district.

Feed ground for 6 cents
per hundred at the big
mill.

J. R. Dafoe wishes to notify his customers and the public generally that the price for grinding feed at the big mill for the present and until further notice will be six cents per hundred pounds with one pound per hundred off for waste. The mill is equipped with two of the best grinding machines known to the trade with a capacity of twenty-five tons per day, feed ground as fine as desired and ready when you call for it.

Your patronage solicited,
J. R. DAFOE.

On Wednesday, 16th Feb., a number of the friends of Mr. and Mrs. Robert Potter assembled at their home and presented them with a kitchen shower. There was a long list of presents.

FAIR VIEW

The roads are in bad condition with pitch holes.

Herbert Free bought a fine horse from Herbert Loys.

Stacey Vanalstine attended the funeral of his uncle, Garrett Vanalstine, on Wednesday.

Mr. and Mrs. Stanley File were "At Home" to a number of their friends on Friday evening.

Samuel McNeill visited at Levi Thompson's recently.

BEITHEL.

Mr. and Mrs. Levi Salsbury visited friends in Yarker on Sunday.

Mr. Shutler, assessor, has been through these parts.

The path masters have been on duty looking after the north and south roads.

E. Freeburn is making improvements on his barns.

Miss Waggar spent Saturday and Sunday at home.

Mr. and Mrs. T. McWilliams visited D. Stuart, Yarker, on Sunday.

Mrs. A. Shair and son will leave soon for their home in Alberta.

Mr. and Mrs. J. Stuart and Mr. and Mrs. B. Sutton, at J. B. Alkenbrack's.

WALNUT GROVE.

Azel Buck received the sad news of the death of his son, Oscar, on Friday of last week. Deceased was born in this place and lived here most all his life. He moved to Edmonton, Alberta, four years ago where he resided until the time of his death. He leaves a wife and four small children, besides his aged father, two sisters and four brothers. Deceased's many friends will receive the sad news with sorrow as he was well known in this place.

Mrs. S. Bell passed peacefully away on Sunday evening at the ripe age of eighty-four years. She was widely known for her kind sympathy for everyone in trouble. She was a lifelong member of the Methodist church.

An aged husband survives. The funeral was held from her late residence, Walnut Grove, thence to Morven, where a large concourse of friends gathered to pay their last respects.

MARLBANK.

Miss A. McGinnis visited friends in Roblin, Sunday last.

Rev. Mr. Jones, of Tamworth, is visiting friends here.

Miss York, of Erinsville, is visiting Miss Grace Pringle.

E. A. Watson has taken a position in the brick works, Port Credit.

Frederick Brown and family have moved to the village from the cement works.

Mrs. A. Hazard, an aged and respected lady, passed away on Feb. 16th in her ninetieth year.

John Allen passed away on Feb. 19th. Mr. and Mrs. A. Smith attended the funeral of her mother, Mrs. Hinch, at Stoco, Monday.

Mrs. Dr. Mather attended the funeral of her father, John Allen, Monday.

Miss Pearl Nesbit spent Tuesday in this vicinity.

Mrs. J. Murphy has returned home, after spending a couple of weeks in Belleville.

Miss Annie Pearl Mowers has returned home, after spending several weeks in Belleville.

James McHolland has secured a position in Port Colborne, and expects to move there in a month or so.

Frank Paris spent a few days in Montreal last week.

Mrs. L. Deline and son, Roy, have returned home, after spending a few weeks with L. Deline, Port Credit.

Any Prescription from Any Doctor.

Will be promptly dispensed at Wallace's Drug Store. We pride ourselves in keeping further advanced than most Drug Stores. Always a graduate of the Ontario College of Pharmacy in charge of the Dispensing Department. Our charges are just what they should be—not a cent more nor a cent less. Remember that in medicines, Quality should be first consideration.

All the New Spring Hats ! are Here now

ready for your selection. You should buy early before the sizes are broken. We sell the best Hats made at the same price inferior hats are being sold for.

J. L. BOYES,

CAMDEN EAST.

William Saul, an aged resident, who is visiting his son, David Saul, of this place, has been seriously ill.

Mrs. Clarence Milligan and young son were guests at Joshua Switzer's, Switzerville, for a few days last week.

Mr. and Mrs. J. McLean, of the B. of Q. R. R. station, here, entertained their friends at an oyster supper recently.

Mrs. Carroll is spending a month with her daughter, Jennie, of Blackstock.

Mrs. Wellington Perry has returned from visiting her three sons at Winnipeg.

Mrs. Archibald Alcombrack and children visited Westbrook and vicinity last week.

Miss Genevieve Taylor visited her friend, Miss Violet Perry, on Sunday.

Miss Edna Bicknell and friend, Miss Sloane, Conway, were on Saturday and Sunday at W. Bicknell's.

H. McGuinness has men engaged getting out ice for the cheese factory. Mrs. L. D. Williams is visiting in Napanee.

Zymole Trokey's

Fresh from the manufacturers at Jessop's Pharmacy. They allay all irritation of the throat.

PUBLIC NOTICE.

The method of ringing the fire

YARKER.

There has been no delay of trains on the B. of Q. R.R., this winter. Trains all arrive and depart in good time.

Teaming has not been impeded to any extent on the country roads.

James Goslin's son had his leg scalded by the upsetting of a kettle of boiling water.

H. Oldham, at Trinity College, Port Hope, had his nose broken in a game of hockey.

About all of Yarker's young ladies who go west get married. Miss Ethel Barton is the next one to go, and is expected here on her wedding trip.

Walter Shultz, of Kingston, was visiting at Sime Babcock's.

Two of Frank Simpkins' children are very ill.

Frederick Johnston has bought the residence occupied by M. Foster and also the stock of groceries and fixtures thus closing out an opposition. Mr. Foster will move to Yarker and occupy the residence vacated by J. A. Vandewater.

Yarker Adult Bible class held a very successful "At Home" at the residence of Henry Walker last Thursday night. The next one will be held on the third Thursday in March at the residence of Egerton Vanlunen.

The classes of Mrs. Batstone and Mrs. Martin held a union social in the parsonage Friday night.

Mrs. Weidmark, of Cardinal, was the guest of Mrs. S. Winter.

Mrs. S. Winter and Mrs. John Wright, Jr., were visiting Mrs. J. D. Shibley, Harrowsmith.

Mrs. F. E. Benjamin, who was so seriously injured in the automobile accident, made her first trip to Kingston last Saturday since the accident.

TAMWORTH.

The winter is passing over quickly and leaving many sorrowful homes. The people of this district are dropping away very fast. The vaults are claiming their victims. The body of Hugh Cunningham was put in the vault, Mrs. Andrew Burn's baby's body was put in Erinsville vault on Monday, and Mr. John Allen's body from Marlbank was put in the Tamworth vault.

A very sad death from croup occurred at the home of Mr. D. B. Floyds, in that of his only son, aged 3 years and 7 months. A very bright and intelligent little child he was his mother's pride and his father's joy. His place will be vacant at the table.

He no longer rests in his little cot, His father and mother no longer his sweet smiles will see.

He is gone to his heavenly father above.

We are having beautiful winter weather here now. Good sleighing and wood drawing is the order of the day.

Mr. Richard Powers has been negotiating towards purchasing a two horse power sawing machine of the latest type. So those who have their summer wood to cut would do well to engage him.

The farewell supper given in respect of Mr. W. J. Fuller on the eve of his departure from here was a grand success. We are very sorry to see Mr. Fuller leave, as he has been a life long resident and a good neighbor.

Mr. John Sorring has opened up a grocery store on the corner, in the old Herchimer block, and is doing a good business. May he prosper.

The Knickerbocker Spraybrush connected to a combination hot-and-

NEW LUMBER YARD

irritation of the throat.

PUBLIC NOTICE.

The method of ringing the fire alarm from the different fire boxes is as follows:—

In case of a fire the key of the box will be found in a glass enclosure along side the box. Break the glass and insert the key in the lock and open the door. Then pull the lever down **ONCE**. This is all that is necessary to send in an alarm. In case it is desirable to repeat the alarm, wait until the bell stops ringing, and then pull the lever down once more.

Cut Flowers at Wallace's.

From now until Easter we will be able to supply fresh cut carnations almost any day—price, 75c doz.—no charge for green. Dunlop's designs for funeral are superior to any others in Canada and we can give at least 10% better value at Wallace's Red Cross Drug Store.

TAMWORTH.

Russell Shire and wife returned to the west after a visit with their aunt and friends in and about Tamworth.

Mrs. Alex. Hanard died at Marlbank this week. She was a resident of Sheffield for a number of years.

Hugh Cunningham died on Thursday last. The funeral on Saturday was very large.

Mrs. William Little visited her parents for the past few days, Mr. and Mrs. Jas. Bushey.

W. A. Fuller has disposed of all his property and will leave for Montreal to reside.

Malcolm Floyd, who has been very sick, is recovering.

James Water, Clara Craig, Charlie Smith, Robert Water and Finley Bell have returned from the west.

Mr. and Mrs. Jackson, the latter formerly Miss Flossie Bell, were here one day this week.

William Donovan has moved into his new home.

Purest Norwegian Cod Liver Oil 50 cents per pint, 20 ozs. at Jessop's Pharmacy.

A Newark man has a two-inch wire nail in his throat. That's nothing. R. L. Borden has two Dreadnoughts in his eye.

Laurence McDermott, a well known resident of North Tyendinaga, died very suddenly last week from heart disease.

Hugh Cunningham, of the neighborhood of Tamworth, after a few days illness fell a victim to pneumonia on Friday morning, February 18th.

Premier Whitney said in the Ontario legislature, on Friday, the government would take drastic steps to stop reckless driving of automobiles.

It is rumored that the Marlbank cement works may be re-opened, as it is said the Quebec bridge people prefer the Marlbank cement to that of any other.

resident and a good neighbor.
Mr. John Sorring has opened up a grocery store on the corner, in the old Herchimer block, and is doing a good business. May he prosper.

Finest Bath-Room Requisite.

The Knickerbocker Spraybrugh connected to a combination hot-and-cold water faucet ready for use. Only the turn of the faucet is needed to raise or lower the temperature of the water to suit the pleasure of the bather, at The Medical Hall—Napanee's Largest Drug Store—Fred L. Hooper.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for restoration of, and additional story to Military Stores Building, Ottawa, Ont." will be received at this office until 3:00 p.m. on Monday, March 7, 1910, for the work mentioned.

Plans, specifications and form of contract can be seen and forms of tender obtained at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their names, or names and their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,

NAPOLEON TESSIER,
Secretary.

Department of Public Works,

Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon, and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section adjacent to his homestead. Price, \$300 per acre.

Duties—Must reside six months in each of six years from date of homestead entry including the time required to earn homestead patent, and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$300 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$500.00.

THE VOICE OF CONSCIENCE

Man Must Develop the Power of Knowing and Choosing the Right

"And herein do I exercise myself, to have always a conscience void of offence." —Acts xxiv., 16.

Conscience is one of the least understood and most generally misused words in religious phraseology. It has become the guise for many crimes, the excuse for sloth and self-indulgence. It elevates the individual will, reason or prejudice into an infallible guide not only as to the person's own conduct, but also as to all conduct.

In the name of what we call conscientious scruples we pronounce judgment on our neighbors, deciding they must be depraved because their tastes in certain matters which we regard as moral happen to differ from our own. Custom and culture having set up standards in our own minds, we make them the measure for all men.

Often we have made these judgments of conscience the cause of conflict and division. We have asked questions as to personal habits, for example, as to clothes, smoking, dancing, theatre attendance. Being quite clear, perhaps, that these things were wrong to us, our consciences so asserting, we have insisted that any who cared for them must be beyond the range of human respectability and of divine regard.

TEMPTATION ALWAYS.

There is a constant temptation to make my own moral taste an other man's mentor, to pass judgment on him according to my own standards, and to condemn him if he offends my conscience. This is a facile temptation because it gives us a sense of conscientious activity without making strenuous demands on our own powers of improvement.

So much is said about the voice and authority of conscience, so many foolish things are quoted giving it the credit of divine infallibility, that most people have come to think they have in them some separate faculty which would always guide them right if they would only give it a chance to do so. So they wait for an inward feeling and thus become the prey often of blind prejudice.

But as a matter of fact conscience may be blind, may be deluded and deluding; may be twisted, distorted, a hideous, and an evil thing.

nourished on prejudice and passions, an instrument of darkness and depravity. The sum of all one's tastes and judgments in moral matters may be wholly wrong because conscience, this power of judging right and wrong, has never been rightly developed and trained.

Man has to learn the difference between right and wrong, between that which makes for the good of life and that which mars its beauty and development. No angel voices whisper in his ear, no guest in his breast warns him when as a child he plays with matches, picks up poison, keeps a town awake with his fretful screams, or playfully smashes the neighbor's windows. Life must teach him judgment.

Conscience is simply the trained power of judgment as to the right in moral matters. Our business is to seek the development of that power of wise discernment and choice.

CONSCIENCE IS THE ECHO of my own character, for it is the fruitage of my training and habits of life. It is our business not to wait for some voice from the skies but to develop in ourselves the knowledge of the way of life.

Character is to be measured by the keenness and delicacy with which one discerns the right and the positive readiness with which one executes that which is indicated, but the activity of conscience is manifest in our own conduct. And life is largely a business of training, educating, the conscience to right judgment and the will to active obedience.

It will not be sufficient to say in answer to any objections or questions as to your acts or attitude that you can only obey your own conscience. It is your duty to discover whether your conscience is a trustworthy guide, to search out the reasons for your conduct, to watch your own judgments of questions.

After all, what is conscience but simply ability in the art of living? It is an active, positive quality which by constant exercise comes to greater mastery of the matter of discerning duty, and lighting up for our feet the way in which we ought to go.

HENRY F. COPE.

made corrupt by expressing itself in fruit. The reverse is equally inevitable. If you want different fruit, there is but one way to get it — change the heart of the tree. Of course it is possible for a clever person to arrange clusters of grapes in an artificial fashion upon thorns, and give the appearance of a grapevine. But then they cease to be fruit and become figments.

19. Fruit trees are not meant for show but for good fruit. If they miss the purpose of their being, they become unprofitable incumbrances of the ground and may as well be burned. This is the teaching of John the Baptist over again (Matt. 3, 10).

20. Therefore — As if to reiterate,

HOME.

COOKIES.

Rocks.—Three eggs, one and one-half cupfuls of sugar, three cupfuls of flour, one cupful of butter, two tablespoonsfuls of milk, one cupful of raisins, and one pound of English walnuts chopped fine, one teaspoonful each of soda and cinnamon, a pinch of salt, one teaspoonful of vanilla. Drop on a tin two inches apart and bake in a hot oven.

Fruit Cookies.—One cupful of sugar, one egg, butter the size of small egg, one teaspoonful cinnamon, one-half teaspoonful of cloves, and pinch of salt. Stir sugar, egg, butter, and spices together, then add one cupful of raisins and one-half cupful of currants chopped fine and one cupful of sour milk in which one teaspoonful of soda has been dissolved, then stir in enough flour to make quite a stiff batter (put teaspoonful of baking powder in the flour), grease your pans and put the batter in a spoonful at a time (it spreads out of itself) and bake in a moderate oven. These cookies will keep for weeks and seem to improve with age.

Peanut Cookies.—One-fourth cupful of butter, two and one-half cupfuls of sugar, one egg beaten light, two tablespoonsfuls of milk, one cupful of flour, one-fourth teaspoonful salt, one level teaspoonful of baking powder, three-fourths cupful of shelled peanuts. Sift together three times, the flour, salt, and baking powder. Cream the butter, add sugar, egg, milk, the flour, and lastly the peanuts chopped and powdered in a mortar. Drop on a buttered tin a teaspoonful in a place. Put half a nut meat on each bit of dough. Bake in a moderate oven. This will make twenty-four cookies.

Marguerites.—Boil one cupful of sugar and half a cup of water until the syrup will thread. Remove to back of stove and add two marshmallows cut into small pieces. Pour on the whites of two eggs beaten until stiff, then add two tablespoonsfuls of shredded coconut, one cupful of English walnuts broken in small pieces, and one-fourth of a teaspoonful of vanilla. Spread saltines with this mixture and bake until a delicate brown.

Ginger Cookies.—One cupful of sugar, one cupful of lard, two cupfuls of molasses, yolks of two eggs, one tablespoonful of soda, one tablespoonful of ginger. Mix sugar, lard, molasses, and eggs. Pour boiling water over the ginger and soda until a cup is filled. Add flour to the ingredients and mix very stiff and let stand for one hour. Roll in sheets and bake. When cool cut in squares and frost, using the whites of the eggs for the frosting.

Drop Cookies.—Three eggs, one cupful butter, one cupful sour cream, two cupfuls granulated sugar, four cupfuls flour, one scant teaspoonful of soda dissolved in sour cream, first put one spoonful of boiling water into soda; one scant teaspoonful baking powder, one teaspoonful vanilla. Drop by tablespoonfuls into pan and bake in hot oven.

DESSERTS.

not believe it until experimented. Made two pies with eggs and two without, substituting a rolled soda cracker for each egg. One pie equalled the other in looks and taste. Boil your pumpkin until done, strain, then add three cupfuls of pumpkin, two cupfuls of milk one and one-half cupfuls of sugar, a little salt, ginger and allspice to suit taste, and two tablespoonsfuls of molasses if you desire them dark. Roll three soda crackers and stir into the mixture. Your pies will be light and rich.

Banana Pie.—Bake with one crust. Bake pie crust first. When cool take two large bananas and slice them, lay on pie crust, beat the yolks of two eggs to a cream, add two cupfuls of milk, one-half cupful of sugar, two tablespoonsfuls of flour, and a small piece of butter, a pinch of salt, boil till a good stiff custard, let it cool, then spread over banana, make a meringue of the white or two eggs and sugar, spread on pie, put in oven to brown. This is a good pie, liked by all that have tried it.

FOOD VALUES.

One quart of oysters has the same value in the way of nourishment as one quart of milk.

Do not serve several foods of the same composition at the same meal, such as potatoes, rice, and macaroni. They are all starch foods, and do not give variety enough for the system.

Have a good variety of menu. Do not serve the left overs at the next meal, save them for the next day and try to prepare them in a different manner from that in which they were first served.

Try and vary the regular diet. If a heavy meal is served use a light, easily digested dessert. Have the meal well balanced.

Food can often take the place of medicine. Eat a variety at every meal, thus giving the system all kinds of material to build on.

Lard used for frying cakes or croquettes can be clarified and used again by heating thoroughly with several slices of raw potatoes and then straining. Cannot be clarified after cooking fish.

Be seasonable in eating. Do not eat too much food when it is out of season. It is never as good nor as digestible.

THINGS WORTH KNOWING.

Stains on knife handles may be removed by rubbing with a paste of whiting and turpentine.

Flour for cakes and pastry should be well dried and passed through a sieve before using. This is half the secret of light cakes.

German yeast, when used for bread, should always have a little sugar added to it, for this helps the sponge to rise more quickly.

To remove iodine stains put some liquid ammonia into a saucer and place the stained part of article in it. Rub well and the stain will vanish.

To work buttonholes in net, baste a small piece of muslin underneath. Work the buttonhole through and afterward cutting the muslin from beneath.

When the ankle has been sprained it should immediately be bathed in very hot water, then bandaged and placed in a position higher than that of the body.

When doing a piece of embroidery that will not wash, paste tissue paper over the part that is finished and then it will hold on with the aet service.

Man Must Develop the Power of Knowing and Choosing the Right

"And herein do I exercise myself, to have always a conscience void of offence."—Acts xxiv., 16.

Conscience is one of the least understood and most generally misused words in religious phraseology. It has become the guise for many crimes, the excuse for sloth and self-indulgence. It elevates the individual will, reason or prejudice into an infallible guide not only as to the person's own conduct, but also as to all conduct.

In the name of what we call conscientious scruples we pronounce judgment on our neighbors, deciding they must be depraved because their tastes in certain matters which we regard as moral happen to differ from our own. Custom and culture having set up standards in our own minds, we make them the measure for all men.

Often we have made these judgments of conscience the cause of conflict and division. We have asked questions as to personal habits, for example, as to clothes, smoking, dancing, theatre attendance. Being quite clear, perhaps, that these things were wrong to us, our consciences so asserting, we have insisted that any who cared for them must be beyond the range of human respectability and of divine regard:

TEMPTATION ALWAYS.

There is a constant temptation to make my own moral taste another man's mentor, to pass judgment on him according to my own standards, and to condemn him if he offends my conscience. This is a facile temptation because it gives us a sense of conscientious activity without making strenuous demands on our own powers of improvement.

So much is said about the voice and authority of conscience, so many foolish things are quoted giving it the credit of divine infallibility, that most people have come to think they have in them some separate faculty which would always guide them right if they would only give it a chance to do so. So they wait for an inward feeling and thus become the prey often of blind prejudice.

But as a matter of fact conscience may be blind, may be deluded and deluding; may be twisted, distorted, a hideous and an evil thing,

nourished on prejudice and passions, an instrument of darkness and depravity. The sum of all one's tastes and judgments in moral matters may be wholly wrong because conscience, this power of judging right and wrong, has never been rightly developed and trained.

Man has to learn the difference between right and wrong, between that which makes for the good of life and that which mars its beauty and development. No angel voices whisper in his ear, no guest in his breast warns him when as a child he plays with matches, picks up poison, keeps a town awake with his fretful screams, or playfully smashes the neighbor's windows. Life must teach him judgment.

Conscience is simply the trained power of judgment as to the right in moral matters. Our business is to seek the development of that power of wise discernment and choice.

CONSCIENCE IS THE ECHO

of my own character, for it is the fruitage of my training and habits of life. It is our business not to wait for some voice from the skies but to develop in ourselves the knowledge of the way of life.

Character is to be measured by the keenness and delicacy with which one discerns the right and the positive readiness with which one executes that which is indicated, but the activity of conscience is manifest in our own conduct. And life is largely a business of training, educating, the conscience to right judgment and the will to active obedience.

It will not be sufficient to say in answer to any objections or questions as to your acts or attitude that you can only obey your own conscience. It is your duty to discover whether your conscience is a trustworthy guide, to search out the reasons for your conduct, to watch your own judgments of questions.

After all, what is conscience but simply ability in the art of living? It is an active, positive, quality which by constant exercise comes to greater mastery of the matter of discerning duty, and lighting up for our feet the way in which we ought to go.

HENRY F. COPE.

made corrupt by expressing itself in fruit. The reverse is equally inevitable. If you want different fruit, there is but one way to get it—change the heart of the tree. Of course it is possible for a clever person to arrange clusters of grapes in an artificial fashion upon thorns, and give the appearance of a grapevine. But then they cease to be fruit and become figments.

19. Fruit trees are not meant for show but for good fruit. If they miss the purpose of their being, they become unprofitable incumbrances of the ground and may as well be burned. This is the teaching of John the Baptist over again (Matt. 3, 10).

20. Therefore—As if to reiterate, with the force of demonstration, the statement made in verse 16. The law universally applicable in nature must be true among men.

21. Not every one that saith—The Judgment Day is in the thought of Jesus. There also the false prophets will make their loud professions. Entrance into the Kingdom

COOKIES.

Rocks.—Three eggs, one and one-half cupfuls of sugar, three cupfuls of flour, one cupful of butter, two tablespoonfuls of milk, one cupful of raisins, and one pound of English walnuts chopped fine, one teaspoonful each of soda and cinnamon, a pinch of salt, one teaspoonful of vanilla. Drop on a tin two inches apart and bake in a hot oven.

Fruit Cookies.—One cupful of sugar, one egg, butter the size of small egg, one teaspoonful cinnamon, one-half teaspoonful of cloves, and pinch of salt. Stir sugar, egg, butter, and spices together, then add one cupful of raisins and one-half cupful of currants chopped fine and one cupful of sour milk in which one teaspoonful of soda has been dissolved, then stir in enough flour to make quite a stiff batter (put teaspoonful of baking powder in the flour), grease your pans and put the batter in a spoonful at a time (it spreads out of itself) and bake in a moderate oven. These cookies will keep for weeks and seem to improve with age.

Peanut Cookies.—One-fourth cupful of butter, two and one-half cupfuls of sugar, one egg beaten light, two tablespoonfuls of milk, one cupful of flour, one-fourth teaspoonful salt, one level teaspoonful of baking powder, three-fourths cupful of shelled peanuts. Sift together three times, the flour, salt, and baking powder. Cream the butter, add sugar, egg, milk, the flour, and lastly the peanuts chopped and powdered in a mortar. Drop on a buttered tin teaspoonful in a place. Put half a nut meat on each bit of dough. Bake in a moderate oven. This will make twenty-four cookies.

Marguerites.—Boil one cupful of sugar and half a cup of water until the syrup will thread. Remove to back of stove and add two marshmallows cut into small pieces. Pour on the whites of two eggs beaten until stiff, then add two tablespoonfuls of shredded coconut, one cupful of English walnuts broken in small pieces, and one-fourth of a teaspoon of vanilla. Spread saltines with this mixture and bake until a delicate brown.

Ginger Cookies.—One cupful of sugar, one cupful of lard, two cupfuls of molasses, yolks of two eggs, one tablespoonful of soda, one tablespoonful of ginger. Pour boiling water over the ginger and soda until a cup is filled. Add flour to the ingredients and mix very stiff and let stand for one hour. Roll in sheets and bake. When cool cut in squares and frost, using the whites of the eggs for the frosting.

Drop Cookies.—Three eggs, one cupful butter, one cupful sour cream, two cupfuls granulated sugar, four cupfuls flour, one scant teaspoonful of soda dissolved in sour cream, first put one spoonful of boiling water into soda; one scant teaspoonful baking powder, one teaspoonful vanilla. Drop by tablespoonfuls into pan and bake in hot oven.

DESSERTS.

Cranberry Fluff.—Cook one quart of cranberries in one-half pint of water, until they open, then run through a colander (use a flour sifter instead of the colander, as it saves so much time), add the same amount of sugar as you have berry pulp, boil until thick as marmalade. When cool add the whites

of pumpkin, two cupfuls of milk one and one-half cupfuls of sugar, a little salt, ginger and allspice to suit taste, and two tablespoonsfuls of molasses if you desire them dark. Roll three soda crackers and stir into the mixture. Your pies will be light and rich.

Banana Pie.—Bake with one crust. Bake pie crust first. When cool take two large bananas and slice them, lay on pie crust, beat the yolks of two eggs to a cream, add two cupfuls of milk, one-half cupful of sugar, two tablespoonfuls of flour, and a small piece of butter, a pinch of salt, boil till a good stiff custard, let it cool, then spread over banana, make a meringue of the white or two eggs and sugar, spread on pie, put in oven to brown. This is a good pie, liked by all that have tried it.

FOOD VALUES.

One quart of oysters has the same value in the way of nourishment as one quart of milk.

Do not serve several foods of the same composition at the same meal, such as potatoes, rice, and macaroni. They are all starch foods, and do not give variety enough for the system.

Have a good variety of menu. Do not serve the left overs at the next meal, save them for the next day and try to prepare them in a different manner from that in which they were first served.

Try and vary the regular diet. If a heavy meal is served use a light, easily digested dessert. Have the meal well balanced.

Food can often take the place of medicine. Eat a variety at every meal, thus giving the system all kinds of material to build on.

Lard used for frying cakes or croquettes can be clarified and used again by heating thoroughly with several slices of raw potatoes and then straining. Cannot be clarified after cooking fish.

Be seasonable in eating. Do not eat too much food when it is out of season. It is never as good nor as digestible.

THINGS WORTH KNOWING.

Stains on knife handles may be removed by rubbing with a paste of washing and turpentine.

Flour for cakes and pastry should be well dried and passed through a sieve before using. This is half the secret of light cakes.

German yeast, when used for bread, should always have a little sugar added to it, for this helps the sponge to rise more quickly.

To remove iodine stains put some liquid ammonia into a saucer and place the stained part of article in it. Rub well and the stain will vanish.

To work buttonholes in net, basic a small piece of muslin underneath. Work the buttonhole through and afterward cutting the muslin from beneath.

When the ankle has been sprained it should immediately be bathed in very hot water, then bandaged and placed in a position higher than that of the body.

When doing a piece of embroidery that will not wash, paste tissue paper over the part that is finished and keep it rolled up, with the embroidery inside.

Sleeping after eating is condemned by a German physician, who has shown experimentally that stomach movements are lessened and acidity is induced.

Mixing Mustard.—Mix with hot water, using three parts of mustard

us with an alternative. There are two gates. We can go in at either, but not at both. And it is easier to pass through the wide gate, for you can carry with you anything you like. After you once choose that gate you find that it opens upon a broad way. There are no restrictions, and you have the sense of company, for many are there with you. But the way leads inevitably to destruction.

14. The narrow gate, on the other hand, opens into a straitened way. There continues to be no room for the things renounced at the entrance. To travel that way one must have laid aside all sin and selfishness, all shame and follies. But it is worth while; for there is no surrender of freedom, and the end is life, a condition of unshakable happiness.

Few are they that find it. Literally, "Few are finding it." This throws no light on the question as to the number of the saved. When Jesus was asked that question he avoided a direct answer. Instead, he cautioned men to strain every energy to get in, for themselves. "There is no list published of the citizens of heaven." One thing is certain, that the demands of membership in Christ's kingdom are severe and exclusive. No man will reach the goal who does not strip at the start and keep up the struggle with energy and patience.

15. False prophets. Impostors who, under a mask of orthodoxy, lead a corrupt life. The Pharisees whom Jesus arraigned so severely all through his ministry, belonged to this class, guides morally blind (Matt. 15, 14), and therefore totally unfit to teach religion, truth and duty. But Jesus here has in mind (compare verse 22) these unworthy teachers who sprang up with the early life of the church.

What they actually are inwardly, ravening wolves, whose one thought is to prevail upon the flock, is hidden from view by their sheep's clothing, or feint of religiosity. It is necessary, therefore, to watch with exact care (wherever), since it is impossible to detect them at first approach. The idea of this verse is found in Aesop's Fables, but nowhere else in the New Testament.

16. You shall know them. They may with a show of innocence, teach religion and morals, but so long as they fail to produce the fruits of true religion and inward morality, such "fruit of the Spirit" as Paul describes in Galatians, no one can be long deceived.

17. Good tree, good fruit; corrupt tree, evil fruit—This is an unchangeable law of nature. Fruit is the outward manifestation of the inward life. If the tree is good, its nature cannot (18) be

of heaven is not by the mere recital of a creed, but on the condition that men really do the will of God. What that will is Jesus declared (in general terms) in the early part of the sermons (Matt. 5, 20), and unfolded in detail in what follows.

Lord, Lord—Implying a belief on Jesus's part in his own sovereignty.

22. Successful ministerial labors cannot be pleaded as sufficient to admit men into heaven's bliss. It is an observed fact that God does sometimes use the man who has only the outward semblance of the shepherd. The hollow professions, correct teaching, and wonder-working of such men may providentially count for something in establishing the kingdom, but they will have no share in the ultimate blessings of the kingdom.

23. I never knew you. Jesus here distinctly represents himself as the final Judge of men. False prophets may so successfully hide their true nature as to deceive many of their followers. But Christ will infallibly detect those that work iniquity, and they can never, in the nature of the case, abide with him.

24. A wise man. Here we have a true picture of the conditions of house building along the water courses of Galilee. The first man, in all prudence, dug down to the rock and built his foundations strong. Winter's storm and fury found his position impregnable. So is the man who pays good heed to the instructions of the Sermon on the Mount and goes forth to do them.

25. A foolish man. Perhaps he built as well as the other. He may even have put up a more showy house. It did well enough in fair weather. But it collapsed in a dismal heap before the driving tempests of winter. There is no fall (27) more tragic than that of the man who has impressed the world with being a man of excellent worth, but the utter unsoundness of whose foundations has been revealed in the storms of life.

28, 29. The multitudes were astonished, because of the masterful authority which rang through the whole discourse. It was wholly unlike the teaching of the scribes, who relied entirely on tradition.

No man sees anything as it is unless he sees that which is not.

Dinner. "Here, landlord, what's the matter with your dog? I've driven him away a dozen times, but he always comes back again and sits close to my chair, watching every mouthful I take. Do turn him out and let me have my dinner in peace." Landlord. "Ah, sir, in Carlo is such a knowing brute, I expect you have got the plate he generally eats off."

of four eggs beaten stiff, fold well together, bake until it sets (from five to ten minutes), serve cold in sherbet glasses with whipped cream and chopped nuts. This can be used with the meat course or as a dessert.

Cranberry Sauce.—Wash and put one quart of berries in pan. Add two cupfuls of sugar and one cupful of water, cover, and boil slowly for five minutes. Put in a baking dish a layer of berries, then a layer of bananas. Proceed in this way until berries are all used. Spread over the top the whites of two well beaten eggs, sweetened. Bake slowly until brown. Serve when cold.

Apple Charlotte. Butter a pudding dish. Put alternate layers of sliced apples and bread crumbs in the dish, sprinkling apples with sugar and a little cinnamon. Layer of crumbs on the top. Beat an egg, add salt, one cupful of milk and vanilla and turn mixture over bread and apples. Place tablespoonful of butter in bits on top. Bake in moderate oven. Eat with hard sauce or plain cream.

Prune Pudding.—Take one half pound nice large prunes, cook tender. Sweeten to taste and remove pits, put in baking dish. Take yolks of two eggs and a small lump of butter, one half cupful of sugar, tablespoonful of cornstarch and one pint of milk. Stir all together and cook until thickened. Cool and put over prunes. Beat whites of two eggs and put over top and set in oven to brown.

Prune Puddings.—Forty-six prunes, two cupfuls of sugar, seven eggs, whites only. Cook prunes until tender, drain, stone, and wash through a colander; add sugar and whites of eggs beaten stiff; put in buttered covered mold, steam three and one-half hours. Serve with whipped cream. This amount will serve eight persons.

Orange Souffle. Cover one half box gelatin with one half cupful of cold water and soak one half hour. Hull and squeeze six oranges, making one pint of juice. Beat yolks of six eggs until creamy. Add to orange juice one pound granulated sugar and stir until dissolved, then add the yolks. Beat until all is well mixed and add flavoring. Place the gelatin over a steaming teakettle until gelatin is dissolved. Now add this to the mixture, turn all into a bowl, stand in a pan of cracked ice, stir slowly until mixture begins to thicken. Then stir in lightly one pint of whipped cream, fill the empty halves of oranges with the mixture, and put in a cold place to stiffen.

PIES.

Eggless Pumpkin Pie.—Would

you like to have a little cayenne essence is often added and considered an improvement.

To stone raisins easily, pour boiling water over the fruit, let it stand for three minutes and then pour off. The softening of the skins renders the task an easy one.

The busy housewife who dreads darning day may not know that paraffine rubbed on the heels of stockings reduces friction and saves many a jagged hole.

Twenty pounds of grease to twenty pounds of potash, one pound of borax and two pounds of resin, all boiled together for twenty minutes, make first-class soft soap.

Housewives complain that milk puddings and custard curdle in cooking. If the milk is scalded and allowed to become cool before adding the eggs it will not curdle.

To make glue for use on tin, dissolve one ounce of powdered alum in a pint of boiling water, then add two ounces of gum shellac and boil till all is dissolved. Bottle for use.

If you have no flour dredger take a tin of convenient size, punch a number of holes in the lid, and use it as a dredger. This will answer every purpose of the more expensive article.

Those who suffer from aching feet should occasionally sponge down sides of their slates with a moderately strong solution of ammonium. The shoes must be perfectly dry before they are put on.

When the oven smells badly take a vessel of hot water and a handful of washing soda. Take the shelves and wash well in hot water, then finish them in cold. Next wash the oven well out with the soda water, and brush it over with white paint. It will then be clean and sweet, and bake beautifully.

In hanging pictures it is to be remembered that although oil paintings look better hang in the usual way, with a sloping in from the top to the wall at the bottom, yet etchings and water-colors often look better hung flat against the wall. A picture with shadows should, if possible, have the light side nearest the windows so that the shadows will fall naturally.

To keep stove brushes clean, always use old newspapers first, to take off the grease of the stove and oven, and then to polish. A daily polish with old newspapers will keep the stove and steel in good order and with less labor.

We need to change the proportions between the men who are praying for peace in heaven and those who are promoting it here.

Laying hens need lime; more of it than they obtain in grain consumed. Crushed oyster-shell is cheap and good. Old plaster may also be used.

ARMY OF 4,000,000 READY ON BRITISH RAILWAYS SAVES BODY, KILLS MIND DWELLING OF THE VOID

GERMANY'S WAR STRENGTH IS STILL GROWING.

More Than a Million Men are Under Arms at Times on a Peace Footing.

The military correspondent of the London Times in reviewing the position of the German army gives some interesting particulars of its development during recent years. Of the imperial budget of \$712,500,000 for the financial year ending March 31, 1910, the sum allotted for army expenditure was \$202,500,000. This does not represent the whole of the army charges, which are nearer \$250,000,000.

The peace strength of the German army has risen during the past year to 620,000 men of all ranks and 111,820 horses. The number of reservists called out for training during the year has risen to 456,298, excluding officers, or an increase of more than 110,000 over the figures for 1906. The German plan is to train each soldier twice for fourteen days while in the reserve and once for fourteen days while in the Landwehr.

The number of reservists recalled during the year for training has risen of late at the rate of 30,000 a year and will continue to rise until the plan is

IN FULL OPERATION.

Thus there are and hereafter will be more than a million men under arms at one time or another each year.

The year 1907 is the last for which complete statistics of recruiting have been published. The recruits examined numbered 1,189,845, among whom there were 532,092 of the age of 20 who were examined for the first time. In all 435,933 were incorporated in the armed forces, including 212,661 in the active army and 10,374 in the navy.

About one-half of the army recruits were 20 and the remainder 21 or 22. There were only two-one-hundredths of 1 per cent. of illiterates. Voluntary engagements numbered 53,900 for the army and 3,839 for the navy.

"Germany leads the world in aeronautics," says this writer, "and the last year has only confirmed her supremacy in the air. Her aerial fleet consists of twelve dirigibles, systems' Zeppelin, Parseval' and Gross, while there are fifteen other dirigibles in private hands susceptible of being requisitioned."

"The German plan is to act by methods of registration and subsidy; to prepare, as for the navy, the establishments and the means for rapid construction and to aim in particular at increased speed so as to obtain relative independence of the weather. The successful trial of the Gross III., which made over 37 miles an hour on her trial trip on December 31, is

A CASE IN POINT.

The Deutscher Luftfahrtverein aspires to preserve for Germany the lead on aeronautics that she has already acquired. Without exaggerating achievements German soldiers are inclined to believe that

STRANGE REASONS FOR STOPPING TRAINS.

Communication-cords are sometimes Pulled for no Reason Whatever.

The communication-cords of railway trains are often pulled for strange reasons, said an official who has seen many years' service on the iron roads of Great Britain. The communication-cord in general use runs in length from fifty to one hundred yards, and is laid on from the guard's van to the cab of the engine, where it is attached to a gong or an automatic whistle. It is so ingeniously fixed that if it is pulled in any one of the carriages the gong or whistle of the cab of the locomotive must respond, and thus apprise the driver.

Communication-cords are very valuable agents of protection, no doubt, but when they are pulled by irresponsible persons and young fellows who consider it funny to "pull up" a train for no reason whatever, railway officials regret that Parliament passed a Bill in 1868 ordering communication-cords to be installed on certain trains.

NOVEL EXCUSES.

Only the other night a train speeding northwards from London was brought to a standstill because the communication-cord had been violently pulled. When the guard ran along the carriages to learn the cause a young fellow pushed his head through a window and coolly told him that he had pulled the cord because his friend had bet him a sovereign he wouldn't do so.

Some time ago a lady traveling to Scotland pulled the cord of the carriage she was in, and when the train was brought up with a jerk and the guard put in an appearance, she stated that a man sitting opposite her had produced a revolver. The male passenger indignantly turned out his pockets, bringing to light a black leather pipe-case; which the lady had mistaken for a pistol barrel.

Recent mysteries on the line surrounding the deaths of men and girls have had an extraordinary effect on a London merchant, whose business takes him all over Britain. In dread of being robbed and murdered on the railway he bought a revolver, and carried it with him whenever he travelled by train.

A LITTLE MISTAKE.

One night he travelled down to the provinces, and when the train was well out of London the communication-cord was pulled. The guard jumped out of his van and hurried along the train to find out what was the matter. He soon discovered a broken window-pane, and a man standing with his back to it. The compartment was almost a wreck, and the London merchant was lying on the floor of the carriage unconscious. The man who was standing over him told the guard that his fellow-passenger had suddenly produced a revolver, and he had closed with him, taking him to be a lunatic.

When the merchant recovered his senses he stated that he had taken the weapon from his pocket in mistake for his pipe, which little slip

EFFECT OF ABOLITION OF DEATH PENALTY IN ITALY.

First Five Years of Life Sentence Spent in Solitary Confinement.

According to the Italian Penal Code, which abolished capital punishment, the first five years of every life sentence are to be spent in solitary confinement. The prisoner is left in a cell alone, watched day and night lest he should commit suicide, is not allowed to see any human being, not even the guards, is not allowed to talk to himself or read, is fed on a bowl of vegetable soup and a loaf of bread only, and is allowed two hours' exercise daily in a courtyard surrounded by high walls.

PREFER DEATH.

This form of punishment which in Italy is considered more humane than a death penalty, invariably leads to insanity and prisoners serving a life sentence prefer death and strive to commit suicide before they lose their reason completely. Only a few prisoners succeed in committing suicide. Bresci, the murderer of King Humbert, was one of these few and he hanged himself with a towel while the guard who was watching him slept.

There is a special madhouse for criminals at Montelupo, near Florence, and the majority of its inmates are convicts sentenced to life imprisonment. Recently the institution was visited by a party of medical students, who furnish details about the condition of the two regicides, Acciariato and Passanante, who are both insane.

BELIEVES HE IS KING.

Acciariato, who attempted the life of King Humbert in 1897, believes that he is the King of Italy and that King Victor Emmanuel is a usurper. Five years of solitary confinement made him forget entirely that he was an Anarchist and a sworn enemy to all kings. Passanante, who stabbed King Humbert in 1878, has one hand entirely paralyzed and is afflicted with imbecility.

The brigand Musolino has recently been conveyed to the Montelupo madhouse, which is the last refuge of criminals who in other countries would have been sentenced to death, and here in Italy instead of losing their lives lose their minds.

Whenever a secret of the criminal madhouse is made public Italians realize the cruelty of cellular segregation and a reform is invoked in Parliament. Deputy Di Nicola has now taken the matter up and is striving to bring about the abolishment of cellular segregation, which he qualifies as being "even more hateful than the pain of death."

BRITONS IN UNKNOWN PART OF SOUTH AFRICA.

Members of Scientific Expedition Have Exciting Time With Natives.

Early last summer a few details reached the western world of the experiences of a British expedition which was turned out of southern Arabia. These details were contained in a letter from Mr. G. W. Bury, the leader of the expedition. Mr. Bury has not yet returned to England, but his companion, Mr. P. E. L. Gethin, gives the first personal account of the undertaking.

The object of our party, said Mr. Gethin, which comprised Mr. G. W. Bury and myself, was to penetrate into the unknown part of southern Arabia known as the "Dwelling of the Void." The region is absolutely unknown to modern geographers, none of whom has succeeded in penetrating its mysteries. We were anxious to reach the buried cities in the interior, although the principal object of the journey was to make natural history collections.

When we arrived off the little fishing village of Irka we sent our orderly Sareb ashore with a letter to the chief, who came out to us. Instead of really helping us he was conspiring with the interior chief of Haura to get us partly up country and

LEAVE US STRANDED.

Eventually we got away from Irka with an escort of fifteen men and eight camels. We were both armed and wore turbans, as the people there declare that Christians only wear hats to hide their horns. On the following day the chief of Haura sent a messenger with a letter to say that he would not receive us at any price. Our whole caravan stopped, our boxes were dumped in the open desert, and we found what shelter we could under one tree. We got our camp into a state of defence, and took it in turns to snatch a little sleep. The chief of Haura proved most unfriendly. He would not send us out food, and set a guard over us. Fortunately we had a few biscuits with us, but this was practically all we had for the week we were stranded in the desert.

We were absolutely in the power of the Arabs, and to have attempted a show of force would have been fatal. Every now and again the Arabs fired pot shots at us for amusement, but never hit us, although they struck one tree under which we sat. After five anxious days had passed the chief of Haura sent us a final letter declining to find us an escort, and ordering us to leave the country within three hours. The three of us were very weak, having lived mainly on jam and biscuits, and the prospect of a flight of 35 miles to the coast was not a pleasant one. We had, of course, to discard our baggage, for

OUR ESCORT DESERTED.

I tore out the few written pages of my dairy, we concealed the two chronometers about our clothes, and, with a certain amount of ammunition, were prepared to bolt, our intention being to get away in

7 miles an hour on her trial trip on December 31, is

A CASE IN POINT.

The Deutscher Luftfahrtverein aspires to preserve for Germany the lead on aeronautics that she has already acquired. Without exaggerating achievements German soldiers are inclined to believe that the aerial navy may render good service in the field both for tactical and for strategical exploration, while experiments have been made in dropping explosives from the air-ships.

It is thought that the zone of exploration of the dirigibles is already greater than that open to a cavalry division. It has, moreover, been openly stated that exploration by dirigibles will not await a declaration of war.

In many other directions there has been steady progress in preparing the army for war. The officers at the war school have been increased from 400 to 480. A census of motor carriages has shown that there are 41,727 of all classes available for requisition, and during the manoeuvres of last year great use was made of them and also of motor-cyclists, who will probably be formed into special corps.

The companies of machine guns are increasing, and there will eventually be one company with six guns with each regiment of infantry. The cavalry is now for the greater part armed with the 1898 carbine, modified to take the S bullet and sighted up to 2,200 yards. The distribution of the new automatic pistol, pattern 1908, will be completed this year.

MOBILE FIELD KITCHENS have given good results and will soon be in general use. Wireless stations are being erected at various places. The latest census of horses shows that Germany possesses 4,345,000 horses of all sorts, including 3,500,000 four-year-olds and upward.

In many other minor details the progress of the army has been very satisfactory, and the chief causes of complaint are, first, the deficit of 900 officers in the army, and secondly the manner in which the Emperor's military cabinet deals with questions of selection and promotion.

Excluding 3,000,000 untrained or superficially trained Landstrum and Eisatz reserve, there are over 4,000,000 trained soldiers now available for war, and there are over 6,000 field guns. It has not, however, been the custom of the German staff hitherto to rely so much upon quantity as upon quality.

It will be with young and highly trained men, aged from 21 to 27, that the first great blow will be struck in case of war, and all attention has been concentrated upon making the first echelon of the army as perfect as human effort can compass. The record of the past year shows that from almost every point of view the German army continues to receive constant accessions of material and moral strength.

It's always easier to give your life than it is to live your leisure. Physician (looking into his anteroom, where a number of patients are waiting)—"Who has been waiting the longest?" Tailor (who has called to present his bill)—"I have, doctor. I delivered the clothes to you three years ago."

age unconscious. The man was standing over him told the guard that his fellow-passenger had suddenly produced a revolver, and he had closed with him, taking him to be a lunatic.

When the merchant recovered his senses he stated that he had taken the weapon from his pocket in mistake for his pipe, which little slip was the cause of all the mischief.

The other day a train was stopped in the country by a violent pull of the communication-cord. On getting out of his van to ascertain the cause the guard caught sight of an old lady leaning out of the window of a third-class carriage and frantically waving an umbrella. When he went up to her she calmly ordered him to find her return-ticket, which she had accidentally dropped from the window on to the line.

A COOL YOUNG MAN.

Just after the Paris express had left Milan once an American brought it to a standstill by pulling the communication-cord. When asked the reason of his action he coolly answered that he had left his walking-stick at Milan Station and wished to go back for it.

A suburban train was once pulled up by a monkey. An Italian boy and a monkey were in a third-class compartment, and when the former fell asleep the latter amused himself by swinging on the communication-cord.

A parrot succeeded in making the driver of an express believe that he had run over a woman. Sudden feminine cries, followed by a low meaning, rang out from below the wheels of the locomotive, and the driver immediately shut off steam and brought the train to a standstill.

The permanent way was searched, but no body was found. No clue to the situation could be discovered until a large green parrot was seen clinging to the handrail of the engine. The bird, it transpired, was the property of a lady travelling in the first carriage, and had escaped from its cage while she was asleep. The plaintive cries heard by the driver were undoubtedly made by the playful parrot. —London Tit-Bits.

GERM IS FEEBLER.

Present Day Influenza is of a Mild Character.

The change in the character of influenza in England in the past decade was explained by a physician, who has made a careful study of the epidemics of this disease.

"There is no question," said the doctor, "that present-day influenza is of a much milder character than it was ten years ago. The reasons are twofold: a natural attenuation of the germ, and a partial immunity acquired by our systems.

"Influenza germs do not completely die out at the end of one epidemic. Certain of them last over

from one year to another. The same crop planted from its own seed in the same field will gradually decrease in virulence and the same principle applies to germs.

"The immunity left behind after influenza is slight, but from a series of attacks most of us have acquired a certain ability to withstand it."

You can always get the price of the man who wears his pride on the outside.

LIFE-SAVING DEVICE IN THE BRITISH NAVY.

Air-Traps Provide Breathing Space if Boat is Sunk—Diving Helmet Also.

The crew of a sunken submarine is no longer to be left without means of escape, in the British Navy at least. A recent issue of the Illustrated London News gives an idea of a method by which the crew may escape from the vessel and rise to the surface. Says this paper:

"It is necessary to render the crew independent of poisonous gases caused by salt water coming into contact with the stored electrical energy or open terminals; to preserve the crew from drowning in the boat; and to provide means of escape from the vessel and ascent to the surface. The devices at present known are air-locks for escape; detachable chambers, or life-boats; and self-contained dresses for escape. Air-locks alone are of little use, except in shallow water; combined either with detachable chambers or with self-contained dresses, they are essential in all methods of escape."

AIR-TRAPS.

"When a submarine is holed by accident, the water pouring in will, if the hole be at the top of the boat, gradually replace the whole of the air in the vessel; but if the hole be below the highest point, then the water as it enters will compress the air until the pressure of the latter is equal to that of the water outside. It is obviously necessary, therefore, to provide some device that will catch and contain the air if the vessel be holed high up: hence the provision of air-traps. The accident having taken place and the boat having sunk to the bottom, air will be compressed either under the deck of the vessel itself or under the air-traps.

MEN ABLE TO BREATHE.

Beneath the air-traps the men, having on their special diving helmets, sit with their heads in compressed air, until it is their turn to escape, either through the conning tower or through the torpedo hatch, and rise to the surface. In front of the water-proof jacket, attached to the diving helmet, is a pocket containing a combined purifier and oxygen generator, which enables the same air, purified and re-oxygenated, to be used again and again. The dress, which can be put on in thirty seconds, not only prevents the suffocation of the wearer, but acts as a life buoy.

There are fitted to the air-traps air-supply pipes from the boat's compressed air cylinders, so that an extra pressure of air may be turned on when necessary.

WHAT HE HAD DONE

"I'd be ashamed to beg if I was a big, healthy-looking man like you," said the sarcastic woman.

"You ought to look for a job of some kind. Have you done any thing at all during the past year?"

"Yes, ma'am, I hev," answered the husky hobo meekly. "I just finished doin' thirty days, ma'am."

If your religion is sunshine you will not need to argue about it.

not a pleasant one. We made, of course, to discard our baggage, for OUR ESCORT DESERTED.

I tore out the few written pages of my dairy, we concealed the two chronometers about our clothes, and, with a certain amount of ammunition, were prepared to bolt, our intention being to get away in the middle of the night, when our guards would probably be asleep. We regarded it as almost certain that we should be attacked and murdered before we were able to go far.

We did not get away that night, and, to our surprise, on the following morning the local pundit came out from the town to reopen negotiations. The chief now demanded all our money, in return for which he would provide us with an escort and camels. Keeping only a few dollars, we handed over the money, and in the evening 27 camels arrived. Some shots were fired at us at intervals, but no damage was done. Having loaded our camels, we started on our return to the coast.

The journey was terribly hot, and we were very weak, but we had to make forced marches, and only snatched three hours' sleep. We were absolutely done up when we eventually reached the coast at our original starting place. A dhow put in, and in two days took us to Aden.

LIVE ON 20 CENTS A DAY.

Harvard Professor Believes It is Possible.

In the midst of all the agitation over high prices and the meat boycott, Dr. Franklin White, of the Harvard Medical School, says that neither of those supposed to be present calamities should cause the workingman one whit or worry. In fact, the present agitation should prove a panacea to the American mechanic and laborer, as it will give both a chance to arrange their diet and place it on a safe, sane and economical basis.

Dr. White states that, without fear of contradiction, the ordinary healthful workingman can live on the outside on 20 cents a day and grow fat, harbor his strength and add constantly to it.

Dr. Franklin White's favorite menus, which should prove as solace to the hungry workman are:

Breakfast—Cornmeal mush, one cent; oleomargarine, two cents; syrup, one cent; total, four cents.

Lunch—Potatoes, two cents; oleomargarine, two cents; smoked herring, one cent; cocoa shells and milk, two cents; total, seven cents.

Dinner—Beans, three cents; potatoes, three cents; cocoa, two cents; bread, one cent; total, nine cents.

HARD HIT.

Stella—"Young Biddell seems to be infatuated with the girl he is engaged to."

Maud—"Yes. They say he proposed after seeing her with her hair done up in curl papers."

TACT.

Edward—"Will your mother consent, do you think?"

Angelina—"Yes; I can fix that. I'll get papa to oppose it."

Often you must forget the good you have won to reach the good you would be.

THE DOMINION FORESTS

EXTEND ABOUT 1,000 MILES EAST AND WEST.

Some Interesting Facts Respecting Their Nature and Management.

"If the forests of this great region, so absolutely necessary to a northern district, a great portion of which is not even provided with coal, are to be preserved, an appropriation sufficient to provide an efficient and comprehensive patrol must be given, and the interest involved would thoroughly justify the expenditure." These words are used by Mr. R. H. Campbell, Superintendent of Forestry, in regard to the immense stretch of country lying between Hudson Bay and the Rockies and north of the Saskatchewan and form part of his contribution to the report of the Department of the Interior, lately laid before Parliament. The district extends about 1,000 miles east and west, by some 300 to 600 miles (averaging 400 miles) north and south, and is all more or less forested.

Steps have already been taken for the patrol of the region, rangers having, in 1908, been kept on the Athabasca, Lesser Slave, Peace and Great Slave Rivers, in the region north of The Pas, Saskatchewan, and in the country north of Prince Albert, Saskatchewan, including the Lac la Rouge district, the scene of the mining excitement. Some of the most important points and routes of travel, however, remain unprotected, such as the whole district surrounding and north of Lake Winnipeg as far as Hudson Bay, the whole valley of the Churchill River and a great part of the Peace and Mackenzie River districts.

FIRE NOTICES

have been printed in Cree and Chippewyan for distribution in the north, and a copy of one of these is appended to the report.

A special patrol was maintained along the route of the G.T.P., with the encouraging result that no serious fires occurred. Similar precautions need to be observed on the many other railway lines projected in the northern country.

The importance attached to this branch of the work by the Forestry Branch is shown by the increase in the number of fire rangers from 47, in 1907, to 82, in 1908; these rangers patrol their respective districts, discover and extinguish fires and warn travelers and residents of the danger of setting or neglecting fires. Few serious fires occurred on Dominion lands in spite of the dryness of the season and the consequent risk. The most serious fires were at Salmon Arm, Manson Creek and White Lake, in British Columbia, and in the valley of the Spray River in Alberta.

For the B. C. fires squatters on timber berths were chiefly responsible, and in one case carelessness on the part of a lumber company was a partial cause, for the Spray Valley fire the carelessness of tourists is responsible. By the British Columbia fires 200,000 feet, board measure, of timber were destroyed, and 10,000,000 feet damaged; the Spray Valley fire burned about

in the Spring of 1909, 2,010 applications being supplied. In the Spring of 1910, trees will be sent for the first time to 2,235 new applicants. Heretofore no coniferous trees have been distributed; in 1911 it is hoped to begin the distribution of this kind of stock, the species to be distributed being white spruce, jack pine, lodgepole pine and Scotch pine. To these the tamarack or native larch will probably soon be added. Applications for trees are now handled entirely at the branch's office at Indian Head, instead of at Ottawa as formerly.

NATIONAL PARKS

The Dominion National parks are now administered by the forestry branch, and the report gives a list of these, with a short description of each. The revision of the park regulations is noted. The completion of the fence around Buffalo Park is referred to. This fence is 74 miles long, nine feet in height, and consists of 14 strands of wire. In Ontario the only National park is the St. Lawrence Park Reservation, comprising 11 islands and a small peninsula on the St. Lawrence, between Brockville and Gananoque, formerly owned by a band of the Mississauga Indians. Copies of the report, as well as those of the bulletin referred to above, may be had free of charge, by addressing R. H. Campbell, Superintendent of Forestry, Ottawa.

MILLIONS LIKE THIS.

Terribly Monotonous Life of the Chinese Girl.

Some vivid word pictures by Mrs. Isabella Riggs Williams, missionary of the American Board to China from 1866 to 1897, have recently been published in a book, entitled "By the Great Wall." One of the most striking is that in which the author tries to make plain to her Western readers the great difference which exists between the life of Canadian girls and the circumstances which circumscribe the opportunities of a Chinese girl.

This court, fifteen feet square, surrounded by mud houses, is her home (the Chinese girl) and that of five other families. She cannot go to church or Christian Endeavor meetings, she cannot go to school, or have any kind of an outing more than a dozen times a year.

When she was younger she could go on the street for small items of marketing, but now her mother is watchful of her,—it is time for her marriage,—she is twelve years old, and tall for her age.

Let us see how her day goes. There is a round of washing bowls and pots, sweeping the one or two family rooms, and squatting on a bit of old mat outside the door, to wash, with a brick for a washboard and soda instead of soap. She rubs away patiently at white stockings that are nearly black, and the boys' ragged trousers, besides her own, for girls as well as boys wear trousers in China.

"Well, girl," her mother says, "work away, for to-morrow is the ninth of the ninth month, and if you are diligent to-day you may go with your aunt and me to the missionaries' home. Oh, of course we go to the temple first!"

"Bind your feet a little more tightly, child! Who do you think will marry you with such feet? You know I have always told you that

TRUTH ABOUT TYPHOID

BACILLI FIRST LODGE IN CONTAMINATED FOOD.

Typhoid Fever Does Not Have Its Origin in a Low State of Health.

It is not the true statement to say that typhoid fever has its origin in impaired health. Typhoid fever has just one cause; the typhoid bacillus; and if it were not for this microscopical monster you could be at the lowest ebb in health but you could never contract this dangerous disease.

The typhoid bacillus is as much a known quantity as a hen's egg, except that fewer people have seen it and, thank fortune, raised it. It is a small plant from about one to three twenty-five thousands of an inch long, and about three times as long as it is broad. It is shaped like a rod (whence it is called "bacillus," which is the Latin diminutive for "little rod"); and it has a special travelling outfit, namely, flagellae or hair-like lashes, numbering from five to twenty, by which it produces motion, and gets from one drop of water to another.

UNDERSTAND METHODS.

To appreciate the tricks and the manners of the typhoid bacillus we must understand just how it gets into the human body, what it does there, and how it escapes again. The intestinal tract of man's alimentary canal seems to be the favorite resort of typhoid bacillus; and in order to understand this special liking on his part, let us picture to ourselves the real nature of the digestive passage; simply a long continuous tube, expanded at different places for the stomach and the large intestine, and having direct communication with the outside world by two openings, one for taking in nutritious food, the other for expelling waste matter.

CONTAMINATED FOOD.

Into this digestive tube, typhoid bacilli are received when food or drink contains them, as for example, oysters, milk, water, fruit, in a contaminated condition. Lodged in the lower intestine, the typhoid bacilli begin to multiply and carry on their life process, doing deadly damage thereby to the tissues, eventually causing the sickness known as typhoid fever.

If these bacilli, then, once gain access to the digestive tract, only the individual resistance of the human victim can withstand them; there is no medicine or dose known to the medical world at the present time which can combat these little foes or scatter them once they have started on their damaging career. If for any reason there is not sufficient resistance on the part of the person attacked, then in about ten days after the typhoid bacilli have found their way to the intestines, the victim's condition can be recognized as typhoid fever.

NO THANKS TO HUMAN AID.

But if one's natural resistance to typhoid fever can meet these bacilli as they attack, then one escapes having typhoid fever, but without thanks to any human aid. Therefore he who allows another

TROUBLES OF AN EMPRESS

THE CZARINA IS NOW A NERVOUS WRECK.

Apprehension of Danger to Children Has Taken Away Her Peace of Mind.

Rumors regarding the court of Russia must always be viewed with caution. The following stories of the origin of the Czarina's latest nervous breakdown are given by a London paper as coming from a source directly connected with Tsarskoe-Selo:

Always a devoted mother, the Czarina makes it a rule each day to go into a palace schoolroom at nine o'clock in the morning. On at nine o'clock in the morning. One Czarina was astonished to find the children romping with their governess.

"Come," she said, "what is the meaning of this? After 9 o'clock and no lessons commenced?" "Your Majesty," said the governess, "it is not yet nine, and we always have a little play till the hour strikes."

Pulling out her watch, the Czarina said, "You are mistaken; it is nearly a quarter after 9."

BOMB CLOCK.

The governess glanced at a strange clock on the wall, then suddenly with a look of horror tore it from its shelf and rushing to the further end of the room hurled it out of the window into a fountain in the ground beneath. Directly afterward there was a loud explosion, the stonework and ornamentation and the windows of the schoolroom broken.

The Czarina was completely overcome by the thought of the danger that had threatened her children and fainted. She was unconscious a long time and was afterward very ill.

SECOND BLOW TOO MUCH.

Two days later came another blow. One of the little Princesses asked for a glass of milk which was immediately forthcoming. When it did arrive childlike she had changed her mind and instead of drinking it herself gave it to a pet dog. Half an hour later the pet dog was dead. The milk was poisoned and investigation showed that the whole of the milk supply intended for the consumption of the Czar's household had been tampered with.

The Czarina learned of the fresh attempt through the carelessness of an attendant, and from that moment her nerves gave way completely. She is now constantly haunted by fear for the lives of her children. Eleven palace servants were arrested in consequence of these occurrences and they are now in prison. The Czarina's condition is aggravated by the fact that the young Czarevitch has been taken out of her control.

A NIGERIAN RAILWAY.

Being Built to the Manchester of the Sudan.

According to the latest advices from Nigeria, railway construction in the Protectorate is making good progress, and it is expected that by September next there will be through railway communication

sible, and in one case carelessness on the part of a lumber company was a partial cause, for the Spray Valley fire—the carelessness of tourists is responsible. By the British Columbia fires 200,000 feet, board measure, of timber were destroyed, and 10,000,000 feet damaged; the Spray Valley fire burned about 2,000,000 feet.

FOREST SURVEY NEEDED.

There is the greatest need of a survey of this Northern forest belt, to say nothing of its protection from fire. An exploration of this tract, similar to the exploration of Northern Ontario, made in 1900 by the Government of that province, could, Mr. Campbell states, be made for \$200,000, an amount which spread over ten years, would mean an annual expenditure of \$20,000. Some of the main lines of travel through the country are well known, it is true, but large areas are entirely unknown, particularly away from these routes, and in order to secure adequate knowledge upon which to base proper administration of the country, definite knowledge of it is essential.

On the forest reserves timber surveys were continued during 1908, and plans of administration for the reserves are now being prepared in accordance with the results of these surveys. Fire and carelessness have resulted in the deterioration of the reserves, and a long period of management will be required to bring them back into proper condition. Of the whole area of 10,000,000 acres comprised in the reserves, about 1,250,000 acres have been surveyed.

FOREST RESERVE ADMINISTRATION.

The reserves are described at some length by Mr. T. Knechtel, Inspector of Forest Reserves, in his report appended to the main report. The Riding Mountain Reserve is described at length in a separate bulletin, "The Riding Mountain Forest Reserve," by J. R. Dickson, Asst. Inspector of Forest Reserves, the survey of the reserve having been completed. The result

of a "reconnaissance" survey of "The Pines" Reserve, made in the Summer of 1908, is also published as an appendix to the report (Appendix No. 2, Report of H. R. Macmillan, Asst. Inspector of Forest Reserves). Additions to existing reserves have also been recommended. One of these consists of a tract of some 100 square miles, lying to the north of the Saskatchewan River, opposite Prince Albert, Sask. It is also recommended that the Cypress Hills Reserve, in Alberta, be considerably extended; aside from the value of the forests in this reserve, it is found that the reserve is of considerable value as a source of hay for ranchers in the vicinity. The forests of the Crow's Nest district were also reported on by Assistant Inspector Macmillan (see Bulletin No. 5, "Forest Conditions of the Crow's Nest Valley, Alberta"). Regulations for the management of camp sites within the forest reserves are printed at the end of Mr. Campbell's report, and regulations for leases are also given.

TREE PLANTING REPORTS.

Over two and a half million trees were sent out from the Forest Nursery Station at Indian Head, Sask.,

ninth of the ninth month, and if you are diligent to-day you may go with your aunt and me to the missionaries' home. Oh, of course we go to the temple first!

"Bind your feet a little more tightly, child! Who do you think will marry you with such feet? You know I have always told you that a woman should have head and feet nice."

"Rub a little easier, and be saving of the soda. I spent three cents for it, and it will be long enough before I can get more. I shall save up quite a while to get thirty cents, so I can buy cloth for baby a suit. It's getting cool, and the missionary lady says it's because he goes bare that he's sick all the time."

"Mother, can't you buy cloth for me some shoes. Mine have had these bits of cloth glued on the toe for a long time, and they're not very nice."

"Dear, dear, how you children do wear out your things! Well, if you will help with the fur-sewing and we earn ten cents a day regularly, you can buy the cloth next month."

"I need ankle-cloths, too."

"Now, child. What a girl you are! Have you gone and washed yours all to pieces? If I was as strong as I used to be I'd do the washing all myself! Go to the gate and if your brother is there, tell him to come quickly and bring a gal to cook supper with. It's well for us that the grocer trusted me for the millet. We shall not go hungry to-night, as we did last night."

The father comes in with two cents' worth of carrots for supper. He says, "The new foreign doctor is a man of great skill, I hear. Quite a wonderful case they are telling of all over town. But I liked the other doctor; she was very kind to us. I've always thought that when I had time I would go and learn about Jesus."

STANLEY PUNISHED NATIVES.

Explorer's Description of Africans Attacking Party.

In the following language Sir Henry M. Stanley describes an attack of natives upon his party during one of his African expeditions: "The Leviathan bears down on us with racing speed, its consorts on either flank spouting the water into foam and shooting up jets with their sharp prows; a thrilling chant from 2,000 threats rises louder and louder on our hearing. Presently the poised spears are launched and a second later my rifles respond with a rippling, crackling explosion, and the dark bodies of the canoes and paddlers rush past us.

"For a short time the savages are paralyzed, but they soon recover. They find there is death in those flaming tubes in the hands of the strangers, and with possibly greater energy than they advanced they retreat, the pursued becoming the pursuers in hot chase. My blood is up. It is a murderous world, and I have begun to hate the filthy, voracious shoals who inhabit it.

"I pursue them upstream, up to their villages; I skirmish in their streets, drive them pell-mell into the woods beyond and level their ivory temples; with frantic haste I fire their huts, and end the scene by towing their canoes into mid-stream and setting them adrift."

cognized as typhoid fever.

NO THANKS TO HUMAN AID.

But if one's natural resistance to typhoid fever can meet these bacilli as they attack, then one escapes having typhoid fever, but without thanks to any human aid. Therefore he who allows another to believe that any number of doses of medicine can check typhoid fever when once it has started in the human system either displays his own crass ignorance or stands as an opponent to the truths of sanitation.

TYPHOID VACCINE.

But this does not of course take into consideration the recent success in army circles both in this country and in Germany of inoculating with typhoid vaccine to lessen both the virulence of the disease and the death rate. That this measure, adopted wherever our soldiers request it, has met with striking success is without question and gives us fair promise that the terrible loss of life from typhoid fever such as occurred during the Spanish-American war will never again be repeated.—Marion Spratt, in *Detroit Free Press*.

NEW METHODS OF SOCIALISM

Enterprises Based on a Hint Taken From Financial Magnates.

In Europe, if we may believe such a writer and student as Prof. Brooks, the more advanced socialists have practically abandoned the old communism which is still groped after by the noisy socialists of America and have turned to more practical and profitable things by developing the infinite forms of co-operative industry.

In Belgium and in many other parts of Europe, as in England, the advanced socialists are to-day the co-operators. They have taken the hint of the financial magnates and organized co-operative stores, mills, bakeries and so on—in short, formed joint stock companies for the conduct of productive and distributive lines of business for their own benefit and profit.

In the great Austrian capital, Vienna, we find such a socialist venture—a great flouring mill and bread bakery, known as the "Hammer Bread Works" of the "Forward Co-operative Store," an association or company of workingmen that has some 70,000 members.

The great establishment, which was opened on June 20 last, stands on a site once occupied by a cloister and later by an iron smelter and also a flouring mill. The great building erected by the socialists contains a flouring mill of the most modern type known to Austrian milling, with capacity to supply flour for a bakery turning out about 150,000 pounds of bread daily "and then some," the mill marketing a large part of its products directly in the form of flour.

The bakery in its turn is also a model of its kind with great, cheerful, clean and cleanable workrooms and the most advanced machinery for manufacturing bread with the least possible manual labor or contact with human hands, the movable parts of the machinery all getting power from electric motors. Cleanliness and perfection of the products is the aim.

Being Built to the Manchester of the Sudan.

According to the latest advices from Nigeria, railway construction in the Protectorate is making good progress, and it is expected that by September next there will be through railway communication with the city of Kano, the great trade centre, which has been aptly termed the "Manchester of the Sudan." Work is proceeding simultaneously on the two sections of the Nigerian system, one running from Lagos for 300 miles to Jebba on the Niger, where the river is to be spanned by two great bridges and the line continued to Zungeru, the capital.

The other section will begin at Baro, an important navigable point on the Niger, which has been transformed into an extensive railway depot, and running direct to Kano—beyond which point the question of further extension has not yet been considered—with a junction from Minna, 130 miles from the Niger terminus, to Zungeru, where it will be joined up with the line coming from Lagos and crossing the river at Jebba.

With regard to the Bare Kano line the earthworks will be within fifty miles of that city by the end of March, by which time the line will also have reached Zungeru. Railhead is now at Mile 130 (near the junction with the branch to Zungeru), and the rails are expected to be at the Kaduna River, eighty-five miles further in the direction of Kano, by the end of the present dry season. On the extension from Lagos there is already a train service from the sea to the Niger at Jebba (208 miles), and the rails are now laid for twelve miles from the north bank in the direction of Zungeru.

Of the two bridges which will cross the river here the southern bridge, 1,400 feet in length, with seven spans, has been authorized, and the second bridge, connecting Jebba Island with the north bank

a structure of 900 feet in length, with four spans, is well in hand, two spans being completed. Work on the Lagos extension has been somewhat delayed, owing to the fact that a new survey has had to be made and fresh gradients found. Pending the construction of the bridges on the Niger, traffic across the river will be carried on by the train ferry which was despatched from England some months ago and is now on the spot.

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

In Renton last year there were 145 births, 76 deaths and 34 marriages.

A merchant in Glasgow was fined \$50 for selling margarine for butter.

There were 1,395 criminal offences in Patrick last year, a decrease of over 500.

There were 4,443 cases of infectious diseases in Glasgow the third week in January.

In West Perthshire the electorate numbers 8,547, and 7,444 voted—over 87 per cent.

An Alloa pony went up a stepladder the other day and had a good feed in the hay loft.

In Aberdeen last year the apprehensions of drunk and incapable persons decreased by 93.

Over 90 per cent. of voters in Aberfeldy district polled—520 out of an electorate of 571.

The Working Men's Club of Edinburgh start another year with a credit balance of \$4,399.

Fife linen trade is busy and manufacturers would use more looms if they could get hands.

Mr. Andrew Carnegie has offered \$75,000 toward branch libraries at Hillhead and Langside.

Galashiels folk have instituted a crusade against coal men for their bell-ringing on the streets.

It is promised to open Waverley Market, Edinburgh, to the public from 1st April to 1st October.

Since it was formed the Railway Guards' Friendly Society of Glasgow has expended in relief \$1,766,500.

The Regent Road School, Edinburgh, was recently presented with a Union Jack from a school in Dunedin, N. Z.

An anonymous donor has given \$5,000 to the Edinburgh Infirmary, in response to Lord Skerrington's appeal.

The directors of Chalmers' Hospital, Edinburgh, have appointed Mr. Edmund Price official radiologist to the hospital.

Much regret is felt in the Craigish district of Argyll owing to the death by drowning of the daughter of Major Macdougall of Lunga.

SUNSHINE IN UNIFORMS.

"Sister Dora" Had Great Influence Over Man.

Dorothy Winslow Pattison, who was born in the Yorkshire village of Hanwell, in the North Riding of Yorkshire, of which her father was rector, was one of the many bright-faced Englishwomen in nurse's uniform who, in Spenser's beautiful phrase, "made a sunshine in the shady place." In the hospital at Walsall, the sole management of which was put into the hands of "Sister Dora," as she was called, her chief interest lay, according to a brief biography incorporated in "A Book of Noble Wo-

CAPTAIN SCOTT TELLS OF HIS EXPEDITION.

The Kind of Men Required to Meet Strain of Work and Inevitable Hardship.

Despite its discomforts and its death-inviting possibilities, a journey in search of the South Pole has wonderful fascinations for the adventurous.

Over 7,000 people are fully prepared to join the expedition which Captain Scott, the daring explorer, is taking out from England next July or August. But as the party will be only about fifty strong, the thousands who are desirous of inscribing their names on the scroll of fame by reason of having trod the mystic land of snows, must of necessity be disappointed.

REQUISITE QUALITIES.

And really it is questionable if the anxiety to join the gallant little band would be so pronounced if the aspirants knew the perils attendant upon an Antarctic expedition. The qualifications a Polar explorer must possess are numerous and varied.

First he must have a strong heart and a good circulation to meet the strain of work, the long silence, and the lack of food, which sometimes causes terrible suffering. And, considering that he may be called on to take part in a thirty-mile march, dragging heavy sledges the while, he must have wonderful staying powers.

A good, even temper must go with absolute physical fitness and ability to take care of oneself in an emergency.

Then, no one is so popular on an Arctic expedition as the man who can cook well, for each has to take his turn in the kitchen.

"An Antarctic expedition," said Captain Scott to a representative of London Answers, "is not a one-man show, nor a two-man show, nor yet a ten-man show. It is something which demands the cooperation of all. Perils? Discomforts, rather. Snow blindness, for instance. We shall wear goggles made of wood—after the Eskimo style—with a couple of slits, cross-shaped, through which to look.

"Leaving England in July or August, we shall call at New Zealand to pick up ponies, dogs, and stores. We hope to reach McMurdo Sound in December, where a party will be landed to erect permanent winter quarters. The remainder of the expedition will proceed to a point in King Edward VII. Land, in the same latitude as McMurdo Sound, about 500 miles distant. The ship will then return to New Zealand, coming back to fetch the parties from the two bases in the spring of 1912.

THE TRACK TO THE POLE.

"The base hitherto used in British expeditions has, of course, been McMurdo Sound, but a second base will now be established in King Edward VII. Land. This may be very difficult to establish and will certainly be exposed to the full rigor of the Antarctic climate. On the other hand, its distance from the Pole will be no greater than that of the McMurdo Sound base, and the region about

WONDERFUL BODY OF WATER IN CENTRAL AFRICA.

Interesting Account of a Journey Through the Heart of Africa.

One of the most wonderful lakes in the world has just been described to Reuter's by Mr. Fred Sheldford, the well-known engineer, who has been surveying the country from the Uganda Railway to Lake Magadi in connection with a proposed branch line.

"Lake Magadi," says Mr. Sheldford, "is picturesquely situated amid weird surroundings at the bottom of a valley 3,000 feet deep. On one side are mountains 6,000 feet above sea level, and on another a range having an altitude of 8,000 feet. There is no sign of human life, but on and about the lake are immense numbers of flamingoes.

LAKE TEN MILES LONG.

"The lake, which is ten miles long by two or three miles in breadth, is of a somewhat reddish hue. On reaching the shores we found that the water was only a few inches deep, and covered a hard surface looking exactly like pink marble. This is an immense deposit of soda, which was bored and found to extend to a considerable area of at least twenty square miles of solid soda."

This wonderful lake is only reached after a long and difficult journey over uninhabited and waterless country.

Mr. Sheldford's business was to survey for the railway which is to be built, in view of the fact that the Imperial Government has granted Messrs. H. Samuel and Co. a concession for ninety-nine years to work the soda deposits. This railway is to be constructed and worked by the Government, and will be of the same construction as the Uganda Railway, of which it will form a branch.

The expedition (says Mr. Sheldford), which comprised eight Europeans, left the Uganda Railway at the station of Kiu, 265 miles in the interior, and struck westward. The country to be traversed was entirely uninhabited, unknown, and waterless. The route was continually crossed by escarpments eight to ten miles long, and 300 to 400 feet high.

KEPT PRISONER BY LIONS.

The country teemed with lions, giraffes, rhinos, and antelopes. A large base camp having been formed at Kiu, great difficulty was experienced at the very outset in finding the beginning of the road to the lake. Eventually a gorge in the escarpment was discovered, and a chain of camps—finally reduced to five—was formed.

Several of the men employed in cutting tracks were lost. Each camp was supplied with tanks of water brought all the way from Nairobi, and protected by thorn zebreas.

Lions were constantly seen and heard. One night fifteen came round the tents, of which two were shot, two of the askarts were on another occasion set upon by five lions; while at one camp a rhino

The Farm

TO STOP A HORSE KICKING.

A reader asks how to stop a horse from kicking in harness. He has a single driver that occasionally kicks, and desires a remedy. The following plan will be found effective:

Some years ago the writer saw demonstrated a contrivance for stopping kickers that was about as effective as anything that could be devised. It punished the kicker automatically. Every time he made an effort to dust his heels in the driver's face he had his head yanked up so suddenly that the hind feet were promptly returned to terra firma, and after about three attempts to kick, of which the first only was a genuine effort, the kicker settled down and behaved himself. We have seen this used on violent kickers, and invariably with success.

The contrivance is made thus: Tie a steel ring securely to the top of the bridle, having it directly over the horse's poll; tie another ring similarly to the crupper, about four inches back of the highest point of the rump. Get two pieces of quarter or half-inch rope, each piece about 21 feet long. Tie one end of each piece to the bit-ring, one on each side, carry the ropes through the ring at the top of the bridle; run one through each of the rings on the back band, then both through one ring on the crupper. Now pass each rope down and tie to the shaft or cross-bar. Be careful to have the ropes so tied that the horse can move without danger of his movement causing the ropes to jerk on the bit. Then wait for him to kick. He will be a badly surprised horse when he tries it.

As soon as the head goes down and the rump goes up in preparation for dusting off the heels in the driver's eyes or demolishing the dashboard, something is going to happen on the bit that in the kicker's experience never happened before. If the ropes are properly attached, the horse has changed his mind before he gets his heels up very high. Keep the ropes on him till the habit is thoroughly broken—*Farmer's Advocate*.

LIVE STOCK NOTES.

The best way to get a good farm horse is to raise him. Feed him for growth and develop him for your purpose. If you train him yourself you will know what dependence can be placed in him.

Not everyone is adapted to breeding squabs as a regular business, but anyone will make a success with a small loft, and those who can succeed on a larger scale will be able gradually to build up their business until such time as they feel able to cut everything else but the squab raising.

Among a good many farmers the right curing of farm meats has become almost a lost art. It is a real pleasure to visit one of those old-time farms which produce something of everything, cattle, sheep, hogs and, of course, fowls. The delight of sausage-making and the

AYER'S HAIR VIGOR Stops Falling Hair

Ayer's Hair Vigor is composed of sulphur, glycerin, quinin, sodium chlorid, capsicum, sage, alcohol, water, and perfume. Not a single injurious ingredient in this list. Ask your doctor if this is not so. Follow his advice. A hair food, a hair tonic, a hair dressing. Promptly checks falling hair. Completely destroys all dandruff.

OTTAWA NEWS

Sir Wilfrid Laurier last week, moved the second reading of the Naval bill, and before a crowded House, delivered a speech that will take its place among the most erudite, scholarly, patriotic and statesmanlike utterances of any public man of his day and generation.

Long Standing Policy.

Sir Wilfrid referred to the conference of 1902, at which the policy was clearly defined that:

"At present Canadian expenditures for defence services are confined to the military side. The Canadian Government are prepared to consider the naval side of defence as well."

Comparing the wealth of the Dominion to-day to what it was in 1902, the prime minister justified his course by saying that "It is simply because it is a necessity of our condition and the status we have reached as a nation."

Great Britain's Navy.

Alluding to the alleged German war scare, the prime minister ridiculed the idea. Comparing the figures of the German and British navies, he said that the total tonnage of displacement of the British navy in 1912 would be 2,000,000 tons, and that of Germany 990,000 tons, a difference of 1,100,000 tons in favor of Great Britain. Under such circumstances no danger was to be apprehended.

No Emergency Exists.

The navy policy of Canada was not to meet an emergency, because no emergency exists, the alleged war scare is a myth and nothing more. There has just been a general election in Great Britain, and nothing was heard of any feared German invasion. Nothing was said about war being imminent with Germany. Nothing was said about the necessity to build Dreadnoughts on the part of the colonies. Nothing was heard of the alleged danger to the Empire. One had to hear all these things from a few dozen Tory politicians in the Opposition.

Don't All Think Alike.

While there is complete unanimity in the Liberal ranks on the subject of a Canadian navy, built in Canada,

To hand over to the British Government at once a sum sufficient to purchase or build two Dreadnoughts (estimated at \$25,000,000).

Then to submit to the people the question, as to whether Canada shall have navy of her own.

People Won't Hesitate.

The people won't hesitate between these propositions. The first is truly Canadian; it helps to build up the country; it means that the money to do so will be circulated in the country; it provides investment for capital and employment for labor; it keeps Canadian money in Canada.

The second proposition involves sending out of the country one quarter of the yearly revenue of Canada. It means that one quarter of the taxes paid by the people of Canada will be paid out without any representation or accounting to the people who provide the money. It means that there will be no navy built in Canada. It means that Canadians working men will be deprived of their interest in labor to this amount. It means that no shipbuilding industries will be constructed in Canada. It means a sinister sacrifice of Canadian autonomy.

Ridiculous and Inconsistent.

After paying out one quarter of our revenue and having absolutely nothing to say in the expenditure of it, Mr. Borden proposes to refer the subject of a Canadian navy to the people. In other words, he will pay out for navy purposes, outside Canada, the sum of \$25,000,000, without authority of the people, and will afterwards ask authority of the Canadian people to expend \$11,500,000 on a navy of their own.

Mr. Borden suggests spending \$25,000,000 of the people's money without asking their consent and spend it out of the country where they cannot possibly receive any benefit from it, and then suggests asking authority to spend

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease. In order to cure it you must take internal medicine. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

Special Notice.
BETTER THAN SPANKING.
Spanking does not cure children of bed-
wetting. There is a constitutional cause for
this trouble. Mrs. M. Summers, Box 851
Windsor, Ont., will send free to any mother
her successful home treatment, with full
instructions. Send no money, but write her
to-day if your children trouble you in this
way. Don't blame the child, the chances are
it can't help it. This treatment also
cures adults and aged people troubled with
urine difficulties by day or night.

A FEELING OF UNCERTAINTY.

Is What Accompanies a Man Who
Awakens in the Brazil Jungle.

"When you are working in the
jungle you always awake in the
morning with a feeling of uncertainty," says an American civil
engineer, who recently returned to the
United States from western Brazil,
where a railroad is being constructed
through the forest. "Of course, a
surviving party simply has to hew
its path as it goes along, and your
camp is usually in a clearing just big
enough to contain it. About it is a
thick wall of trees, vines and under-
growth that a man cannot pierce
without the aid of an axe, but which
of course are filled with every man-
ner of creeping thing."

"When you awake in the morning,
for instance, you may see a playful
snake wrapped around the pole over-
head, giving every appearance of se-
lecting the proper point from which
to drop into your mouth. You may
feel something soft and clammy rub
up against your ear, and when you
grab at it to fling it away, you find
it is a lizard. Or perhaps a scorpion
may be playing with your hair."

COBALT'S GREAT RIVAL

BROKEN HILL, N.S.W., CLAIMS
TO BE BIGGEST CAMP.

Famous Silver Area Which Has
Yielded \$300,000,000 Since Its Be-
ginning Dates Its Start From a
Deal Involving a Dozen Eggs, Nine
of Which Were Bad—One Mine
Pays \$100,000,000 In Dividends.

Hatched from a dozen stale eggs; that was the beginning of Broken Hill, the great silver camp of New South Wales, called the world's greatest silver camp in fact, although Cobalt seems to be usurping the title. This is how it came about: One day in 1884, when the first of the Broken Hill mines was still a discouraging prospect, a man drifted that way, looked over the ground and made up his mind that there would soon be other stragglers along and that these would want to eat. So he hunted up the prospectors and offered them a dozen eggs for a monopoly of the restaurant privileges on their lease. Eggs were as scarce as the proverbial hen's teeth in that section of the bush country and the offer was hungrily accepted. Thus was the commercial life of Broken Hill inaugurated and never was there a worse beginning. Nine of the eggs were gone past all hope of redemption and the other three were open to grave suspicion, but the bargain held. Thus it happens that the city of Broken Hill, with a present population of 20,000 and a record silver production of \$300,000,000, was hatched from a dozen eggs that were fit for nothing but the discouragement of incompetent barnstormers.

Of the world's bonanza mines few have given a better account of themselves than those of Broken Hill. Think of a mining region in which silver-lead ores are quarried in open cuts, like sandstone or granite or brick clay, and where one remarkable mine, the Consols, has a vein (albeit a narrow one) that yields ores that are 95 per cent. pure silver! The Broken Hill proprietary is the largest silver producer in the world today and in the 25 years that have passed since the barrier (as the argenticore lode is called) was found, its mines have paid more than \$100,000,000 in dividends. They have yielded silver to the value of \$300,000,000, to say nothing of ship loads of lead and zinc and no inconsiderable quantity of gold and copper and there is more high-grade ore "in sight" to-day than at any time in the past.

Like most of the world's great mines, the discovery of the Broken Hill barrier illustrates the proverbial "luck of fools and tenderfeet." In 1869 Charles Rasp left his old home in Germany to seek his fortune. Apparently he didn't find it in a "hurry, for in 1884 he was only a "boundary rider"—and that is a bush country euphemism for sheep herder—killing time and ambition on one of the dreariest stretches of salt bush and mulga bush that ever New South Wales afforded. The country roundabout had been prospected before and was believed to be barren of valuable minerals. However, Rasp noticed that it was a peculiar country that he traversed every day and he decided there must be something of value in the odd-looking outcrops of "ironstone" and the malformed hills.

He knew nothing of geology nor of mineralogy, but made a guess that the something "might be" tin. So he "pegged a block" (or no one "stakes a claim" in Australia) and rustled for help to develop his problematical tin mine. He succeeded in getting together a syndicate composed of himself and six others (all employees of the sheep ranch) each one owning one share. The maximum assessment that could be levied was fixed at 10 shillings a share per

King Leopold's Answer.

Few monarchs have possessed a more caustic tongue than the late King Leopold of Belgium when he chose to exercise it. Once a dispute was raging in the Belgian army as to whether the words of command should be given in Flemish or French. Neither side would give in, and at length it was agreed that King Leopold should decide the matter. The aged monarch asked for a week in which to consider the question. At the end of that period he summoned the leading generals and announced that he had decided that in future all orders should be given in Esperanto. Needless to say, the disputants managed to come to some amicable arrangement.

The Suspension Bridge.

There is no doubt that the first idea of a suspension bridge was suggested to primitive man by the interlacing of tree branches and parasitical plants across rivers. Probably monkeys used them before men did. In very mountainous countries, such as Tibet and Peru, they have apparently been used since the dawn of history, possibly earlier.

"When you awake in the morning, for instance, you may see a playful snake wrapped around the pole overhead, giving every appearance of selecting the proper point from which to drop into your mouth. You may feel something soft and clammy rub up against your ear, and when you grab at it to fling it away, you find it is a lizard. Or perhaps a scorpion may be playing with your hair.

"Then, when you have decided to get up and reach for your boots you are apt to find that a big tarantula has made up his mind that one of them would make a comfortable house, and has put himself and his legs in so cosily and nice that you hate to disturb him. We caught one of these johnnies and killed him and measured him, and without stretching him at all, it was eight inches from the tips of his starboard legs to those he carried on the port side.

"Perhaps your other shoe has been appropriated by a family of giant centipedes, which abound in large quantities.

"As for snakes, the Garden of Eden wasn't in it at all. Some of the big ones, the anacondas, are as big around as your body, and it was not unfrequent that some of our men in chopping away at what they thought were giant roots or vines found they had taken a hick instead at a big snake, and then there was some scampering.

"One of these big fellows that was killed by the men of our party measured 28 feet. We had him skinned and photographed just for proof. You never see the sun when you are in a Brazilian jungle, but there is always something going on, even if it is only crawling."

Celebrating.

"What was that terrible noise going on in Popkin's apartment last night?" asked Wickley of the janitor.

"They were celebrating their wooden wedding," smiled the janitor. "Mrs. Popkin was hitting Popkin on the head with a rolling pin."

"Knocking wood for luck, eh?" grinned Wickley as he passed on, while the janitor chuckled.

Do You Have Headache

TAKE ONE OF THESE LITTLE TABLETS AND THE PAIN IS GONE.

Dr. MILES' ANTI-PAIN PILLS.

"My first experience with Dr. Miles' Anti-Pain Pills was a sample package handed me. They relieved the pain so promptly that I have never been without them since. I have given them to many friends when they had headache and they never failed to relieve them. I have suffered with neuralgia in my head, and the first one I took relieved me. They have cured me of neuralgia. I would not be without them."

DR. MILES MEDICAL CO., Toronto.

the something "might be" tin. So he "pegged a block" (for no one "stakes a claim" in Australia) and rustled for help to develop his problematical tin mine. He succeeded in getting together a syndicate composed of himself and six others (all employees of the sheep ranch), each one owning one share. The maximum assessment that could be levied was fixed at 10 shillings a share per week, or a total of about \$35 a week available for development work. Seven claims, or blocks, were "pegged" and the legitimate parent of the great Broken Hill Proprietary Mining Co. embarked in mine development, with less working capital than would suffice to pay the office rent and postage bill of any really up-to-date American "mining syndicate" trying to float a Nevada prospect showing "free gold" or "virgin silver" "from the grass roots."

It wasn't long until some of the future silver kings began to feel the drain of 10 shillings every seven days upon their meagre salaries. So they were compelled to sell fourteenth, and even twenty-eighth, interest in the mine.

One day a boundary rider named Philip Charley, who had purchased a fourteenth interest, went to camp in great excitement. "Look at that, boys," said he, "we're in luck at last." The "boys" looked at the ore specimen he exhibited, but couldn't see anything to get excited about and one of them remarked disgustedly that it was "nothin' but bloomin' carbonate of lead." "No," said Charley, "don't you see the specks of chloride?" That seemed to the rest of the crowd to be really funny. "Hold on to your share, Charley," said one, "you may make a thousand out of that." "I wouldn't sell out for that," the boundary rider replied. That was considered the wild-est possible flight of the imagination. Yet within three years a fourteenth interest in that mine was worth on the market more than \$250,000. In 10 years it was worth \$2,500,000.

In 25 years the little \$35-a-week syndicate has developed into the world's greatest silver-lead corporation, employing 6,000 men at its mines at Broken Hill and its reduction works at Port Pirie, and the municipality hatched from a dozen stale eggs has grown to be the wealthiest city of New South Wales, the creator of a hundred colossal fortunes.

Held by Etiquette.

When Dom Pedro, then Emperor of Brazil, was entertained at the White House, he had been told by a confused Senator that it would be expected that he, the Emperor, should be the last of the guests to depart.

The President's wife, however, informed her other guests that they would be expected to follow, not precede, the royal party in leaving the house.

The result was that no one dared to go for fear of a breach of etiquette, but at 3 o'clock in the morning a tired woman pretended illness, and the deadlock was broken.

Great is etiquette, but common-sense is sometimes allowable.

Too Big a Job.

While studying her Sabbath school lesson nine-year-old Elizabeth was much puzzled by the statement that Solomon "repaired the breaches of the city of David, his father." This was to her mind a remarkable statement and quite incomprehensible. After pondering it deeply she asked one of the older members of the family for an explanation, saying that she did not think any man could mend the breaches of a whole city.

**Make Each Animal Worth
25% Over Its Cost
On $\frac{1}{3}$ of a Cent a Day**

Nobody ever heard of "stock food" curing the hots or colic, making hens lay in winter, increasing the yield of milk five pounds per cow a day, or restoring run-down animals to plumpness and vigor.

When you feed "stock food" to your cow, horse, swine or poultry, you are merely feeding them what you are growing on your own farm.

Your animals do need **not** feed you, but something to help their bodies get all the good out of the feed you give them so they can get fat and stay fat all year round; also to prevent disease, cure disease and keep them up to the best possible condition. No "stock food" can do all these things. **ROYAL PURPLE STOCK SPECIFIC** can and does. It is

Nota "Stock Food" But a "Conditioner"

ROYAL PURPLE STOCK SPECIFIC contains no grain, nor farm products. It increases yield of milk from three to five pounds per cow per day before the Specific has been used two weeks. It makes the milk richer and adds flesh faster than any other preparation known, with no loss of strength at six weeks.

ROYAL PURPLE STOCK SPECIFIC builds up run-down animals and restores them to plumpness almost magically. Cured bats, colic, worms, skin diseases and debility permanently.

McEwan, the horseman says, "I have used **ROYAL PURPLE STOCK SPECIFIC** persistently in the feeding of 'The Eel' 2024, largest winner of any pacer on Grand Circuit in 1908, and 'Henry Winters,' 20th, brother of 'Allen Winters,' winner of \$36,000 in trotting stakes Specific almost a year ago, and I will always have it in my stables."

Royal Purple
STOCK AND POULTRY SPECIFICS

One 50c package of **ROYAL PURPLE STOCK SPECIFIC** will last one animal seventy days, which is a little over two thirds of a cent a day. Most stock foods in fifteen cent packages are given but once a day, and last but again as long. A \$1.50 pail containing four times the amount of your stock 25c. It is an astonishingly quick fatter, stimulating the appetite and the relish for food, assisting nature to digest and turn feed into flesh. As a hog fatter it is a leader. It will save many times its cost in veterinary bills. **ROYAL PURPLE POULTRY SPECIFIC** is fed 10 days, or a pail costing \$1.50 will last twenty-five hens 280 days which is four times more summer and winter, prevents fowls losing flesh at molting time, and cures poultry diseases. Every package of **ROYAL PURPLE STOCK SPECIFIC** or **POULTRY SPECIFIC** is guaranteed.

Just use **ROYAL PURPLE** on one of your animals and any other preparation on another animal in the same condition; after comparing results you will say **ROYAL PURPLE** has them all beat to death, or else it comes your money. **FREE**—Ask your merchant or write us for our valuable 32-page booklet on cattle and poultry diseases, containing also cooking recipes and full particulars about **ROYAL PURPLE STOCK** and **POULTRY SPECIFIC**.

If you cannot get Royal Purple Specifics from merchants or agents, we will supply you direct, express prepaid, or on receipt of \$1.50 a pail for either Poultry or Stock Specifics.

Make money acting as our agent in your district. Write for terms.

For sale by all up-to-date merchants, **W. A. Jenkins Mfg. Co., London, Can.**

Given Up To Die

No. 100 George St., Sorel, Quebec. "I suffered from womb disease for seven years, with dreadful pains over the front of the body, over the back and down the legs. I had indigestion and chronic constipation and the constipation was so bad that I went sometimes for ten to fifteen days without any action of the bowels. I was ill in bed for one whole year. At one time I was so low that everyone thought I was going to die, and the last Rites of the Church were administered to me. I was treated by six different doctors without any benefit.

MADAME JOSEPH LURETTE

Then I got a sample of "Fruit-a-tives," but I had no faith in them at all, and I would not have taken them only my husband begged so hard for me to try them. As soon as I began to take "Fruit-a-tives" I grew better, the bloating was relieved, the sleeplessness was cured, my stomach acted, and the bowels were moved, but above all the fearful womb pains were made easier.

I have taken eighteen boxes in all and I am now perfectly well again."

(Signed) MADAME JOSEPH LURETTE,

Limited, Ottawa.

WASHED AWAY HIS HOME.

The Fortune That Came to a Man and His Clever Wife.

An Irishman named Whalen found a fortune in a very amusing way, says the Cape Town Argus. With the savings of his wife he bought not far from Ballarat a few acres of ground containing a water pool and a sluggish spring. With the mud and gravel from the bottom of the pool he made sun dried bricks and, building a cabin for himself and family, started a bar for the miners.

Quite contrary to their usual habits, a colony of Chinamen living near by commenced to visit his bar every night. Then Mrs. Whalen discovered that some one had bit by bit carried off the mud pigsty and its surrounding wall so gradually that it had almost gone before she noticed it. Soon the chimney and the cabin walls also began to vanish. After a careful watch Mrs. Whalen discovered that while one band of Chinamen kept her husband busy in the bar another band was stealing the chimneys and walls.

Whalen knew the Chinamen were no fools, and, acting on his wife's suggestion, he also "stole a pan of dirt" from his own chimney and washed it out. Then he ordered tents for his family to live in and washed away the entire house. It was literally built of gold dust. After that the pool and the spring were also attacked, and the result was a big fortune for the lucky Irishman and his cute little wife.

MONKEYS IN BATTLE.

They Fight Under Leaders and Roll Stones on Enemies.

Aesop's ape, it will be remembered, wept on passing through a human graveyard, overcome with sorrow for its dead ancestors, and that all monkeys are willing enough to be more like us than they are they show by their mimicry.

An old authority tells that the easiest way to capture apes is for the hunter to pretend to shave himself, then to wash his face, fill the basin with a sort of birdlime and leave it for the apes to blind themselves. If the Chinese story is to be believed the imitative craze is even more fatal in another way, for if you shoot one monkey of a band with a poisoned arrow its neighbor, jealous of so unusual a decoration, will snatch the arrow from it and stab itself, only to have it torn away by a third, until in succession the whole troupe has committed suicide.

In their wild life baboons as well as many varieties of the monkey tribe undoubtedly submit to the authority of recognized leaders. There is co-operation between them to the extent that when fighting in company one will go to the help of another which is hard pressed.

In rocky ground they roll down stones upon their enemies, and when making a raid, as on an orchard which they believe to be guarded, the attack is conducted on an organized plan, sentries being posted and scouts thrown out, which gradually feel their way forward to make sure that the coast is clear, while the main body remains in concealment behind until told that the road is open.

From the fact that the sentries stay posted throughout the raid, getting for themselves no share of the plunder, it has been assumed that there must be some sort of division of the proceeds afterward. Man, again, has been differentiated from all other creatures as being a tool using animal, but more than one kind of monkey takes a stone in its hand and with it breaks the nuts which are too hard to be cracked with the teeth.—London Globe.

How Eskimo Women Die.

On her first entrance to her new hut of snow an Eskimo woman is buoyed by hope of welcoming a son. What of her last incoming to those narrow confines? She knows that the medicine man has decided that her sickness is mortal when she is laid upon her bed of snow. She gazes upon the feebly burning lamp beside her, upon food and drink set close at her hand. She sees her loved ones pass out of the doorway that needs no tunnel entrance to keep chill airs away, for presently the door is sealed with snow. The chill of death pierces through her enveloping furs. Her tomb insures that no long tarrying will be hers. The soul, companioning with her, may refresh itself with food; but, starving and freezing, her feeble body will witness even that soul's departure and know that its hour has come to perish alone.—Harper's Bazar.

Paying For the Spots.

"I conceived a perfectly dandy scheme for saving my table linen and teaching Jack to be dainty about his carving," said a young married woman. "Every time he gets a spot on the tablecloth I have him cover it with a coin. The larger the spot the larger the coin, and more often than not it takes paper money to cover it all. Then Norah takes up the money when she clears the table, and we save it up to buy kitchen utensils."—New York Press.

CURED OF CONSTIPATION

Mr. Andrews praises Dr. Morse's Indian Root Pills.

Mr. George Andrews of Halifax, N. S., writes:

"For many years I have been troubled with chronic Constipation. This ailment never comes single-handed, and I have been a victim to the many illnesses that constipation brings in its train. Medicine after medicine I have taken in order to find relief, but one and all left me in the same hopeless condition. It seemed that nothing would expel from me the one ailment that caused so much trouble, yet at last I read about these Indian Root Pills.

That was indeed a lucky day for me, for I was so impressed with the statements made that I determined to give them a fair trial.

They have regulated my stomach and bowels. I am cured of constipation, and I claim they have no equal as a medicine."

For over half a century Dr. Morse's Indian Root Pills have been curing constipation and clogged, inactive kidneys, with all the ailments which result from them. They cleanse the whole system and purify the blood. Sold everywhere at 25c. a box.

A Shooting Match

At Which One of the Parties Was Sure to Win.

By AINSWORTH RHODES.

Copyright, 1910, by American Press Association.

The first time I saw Daisy she was coming over her father's broad acres on a horse whose lope was very like a rocking chair. She was riding straddle with divided skirts. No other woman on the ranches thereabout would ride in any other costume. Barker was riding beside her, and the two made a very handsome pair. The brim of his sombrero was flattened against his forehead by the wind, a lariat hung at his saddle bow, and his splendid figure was revealed by his costume—viz. flannel shirt and trousers, with boots to his knee.

Daisy had gone out from the east with her father, who became a sheep raiser, and she had become fascinated with ranch life. Unfortunately she had conceived a romantic idea of the genus cowboy, and Barker being physically a perfect type, she had persuaded herself, or, rather, he had persuaded her, that he was just the man for her. I say "unfortunately" because he was not an educated man and in every way beneath her. There were other features about him to render him undesirable which will appear presently.

The couple passed me, all of us saluting, though they were unknown to me, and I rode on to the ranch house, where I had business with John Nolan with reference to a large purchase of wool. While dickering with him on his veranda up the roadway came the couple I had met and alighted at the foot of the steps. Throwing their bridle reins over a post, they walked up to the veranda. Then I learned that Daisy was Nolan's daughter.

As the pair passed into the house I noticed a cloud tilt over the face of the girl's father. I knew by Barker's bearing toward her that he was in love with her, and I judged that his attention was not welcomed by Nolan. But

ever, he was satisfied with what he had doubtless intended for a warning that if I took Daisy Nolan away from him I would have to face sure death. The witnesses urged me to go in and have something, but I declined, saying that I was anxious for a smoke and would go upstairs for another pipe. The truth is I wanted a chance to go where I could, unobserved, give way to my feelings for a few moments, they having been controlled only by a most desperate effort.

When I was alone I staggered to the bed, fell on it and for a few minutes trembled like a leaf. But when I began to recover I started to get mad at the same time. Men will fight more desperately for a woman than for any other cause, and it occurred to me that, Daisy being the bone of contention, if she preferred me either Barker or I must die. I spent some time considering what to do, then went to the ranch, intending to offer myself to Daisy. If she refused me I would have it out with Barker.

I found Miss Daisy very much excited. She had heard of Barker's shooting escapade and had turned bitterly against him. I told her that I wanted her and if she wanted me I was willing to settle the matter between Barker and myself. Her reply was all I could have asked for, but she positively forbade my coming into collision with my rival. I told her frankly that I believed he would kill me if I married her and that the matter had better be settled before the wedding. Being a woman, she wished to get round the matter by subterfuge and for the time being would consent to nothing definite.

Daisy was very fond of an old rancher called Jake Hutchins. To her he was "Uncle Jake." A day or two after Barker's shooting as I was riding over the country on horseback Hutchins came up behind me and ambled alongside of me.

"I hear about the shootin' o' your pipe unten yer mouth," he said. "Little Daisy was tellin' me about it."

"Oh, it was Miss Nolan who told you, was it?"

"Yes. And, what's more, she asked me to suggest some way o' settlin' the matter without blood spillin'."

"That's impossible," said I.

"So I thought at first, but arter awhile I thought of a plan. Barker's mighty proud o' his shootin', and he's pretty much made up his mind that he's lost Daisy. I reckon he'd agree to settle the matter by a trial o' skill between him and you. He'd consider it his only chance."

"I'm no shot. Such a contest would give Miss Daisy to him, and she doesn't want him."

"Not so fast. You don't need to be much o' a shot. Could you hit a hen's egg at twenty feet?"

"I might in two or three shots."

"Well, I give Daisy my plan, and she's decided to try it. Here's a note for you, and here's a note for Barker. Whichever hits a hen's egg with a forty-two the most outen five shots she'll marry."

He handed me a note to that effect from Daisy and showed me another he was commissioned to deliver to Barker.

"Do you consent?" he added, drawin' rein.

"Yes," I said; "I consent to anything Daisy desires."

Without waiting for more he turned about and rode back in the direction from whence he came.

The next day Uncle Jake informed me that Barker had gladly agreed to the terms.

On the appointed day I made my appearance at the barn, wondering what was to be the result of this con-

test in the meadow again. A prior leave I made with the use to the shootin' day w on or had b shot a had b the w impos Unc from throug

What you want is an Edison Phonograph

DO not be misled. The only kind of sound-reproducing machine that is perfect is the one that Edison invented and the one that Edison makes.

It is the one with the smooth and perfect sapphire point, that doesn't require changing with each record and that doesn't scratch—two points alone that should influence your decision.

Only in the Edison do you find the music-reproducing idea at its best.

Don't take our word for it. Compare the Edison Phonograph with all other instruments side by side, on the same music, if possible, and then you will know better than we can tell you.

Edison Phonographs are sold everywhere in Canada at the same price, \$16.50 to \$162.50. Standard Records, 40c. Amberol Records (twice as long), 65c. Grand Opera Records, 85c. There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Amberol Records. Get complete catalogs from your dealer or from us.

NATIONAL PHONOGRAPH COMPANY

We Now Make and Galvanize Our Own Wire

For many years we have seen where the quality of wire could be improved. So we have set a new standard for the wire in Frost Fence. But, to get this better wire, we must make and galvanize it ourselves.

Heretofore, we, like all other fence-makers, had to buy our wire ready-made and ready-galvanized.

The wire formerly used in the Frost Fence was made under our own instructions. It gave better satisfaction than most wire, but we knew that we could make far better.

So now we have erected special mills. In these mills we have installed the most modern wire drawing and galvanizing equipment in existence.

So we are now equipped to make better wire than has ever been used in Canada.

And we are the only fence-makers in this country making and galvanizing wire exclusively for fences.

Nearly every wire fence is galvanized too thinly for Canadian purposes. That's why so many rust, about twelve or fifteen years sooner than they should.

Frost scientific galvanizing is about 100 per cent, thicker and smoother than that on any other fence made in Canada. Yet it will not chip, scale and fall off.

No matter where you look, or how severely you test, you simply cannot find another fence built and galvanized for permanency like the Frost. Send for free booklet.

foot of the steps. Throwing their bridle reins over a post, they walked up to the veranda. Then I learned that Daisy was Nolan's daughter.

As the pair passed into the house I noticed a cloud lift over the face of the girl's father. I knew by Barker's bearing toward her that he was in love with her, and I judged that his attentions were not relished by Nolan. But he said nothing to me then, and we went on with our dickering. When I arose to go he said:

"There's no place about here in which you will be comfortable except my house. Send for you traps."

I accepted the invitation, especially as I was pleased at being under the same roof with Miss Daisy. I knew she had a lover, but my attraction for her did not then go so far as to intend to come between them. I merely liked the idea of being near her during my stay.

But I stayed a good while, and it was not very long before she and I each made a discovery. I discovered that I wanted her, and she discovered that she didn't want Barker. Meanwhile I found out something else—that he had become frightfully jealous of me, and if I took her away from him he would probably kill me. At first he and I spoke to each other when we met either on the ranch or elsewhere. Then he only noticed me at the Nolan house.

I thought it best after awhile to remove to the (so called) hotel, a mile from Nolan's. If anything happened between Barker and myself I preferred that it should not happen under Nolan's roof. So one day I removed my luggage to my new quarters.

One morning I was sitting on the porch of the hotel smoking a briarwood pipe. Barker came out of the barroom, where he had been drinking, and took a seat about thirty feet from me. I didn't know he was there till, turning my head, I saw him out of the corner of my eye sighting his revolver at me.

Naturally I started.

"Hold on there," said Barker. "Your pipe makes a fine target. We don't allow people to smoke such expensive pipes out here!"

The words were scarcely out of his mouth when I felt a faint tick on the bowl of the pipe, heard the crack of a gun and knew that a bullet had passed through the pipe.

"Wait up!" he growled as I was about to rise. "Your pipe won't draw with a hole in it, but it's still a mighty good target."

I snatched a look at him. He was evidently under the influence of liquor. I felt sure that if I didn't let him shoot at my pipe he would shoot at me and never mind to stand another shot. Indeed, this was all I could do, for I was unarmed. But a cold chill ran down my back and a cold sweat stood out all over me. Nevertheless I put up a pretty good front. I sat with comparative composure, occasionally letting a faint cloud of tobacco smoke escape from between my lips, but not daring to move a hairbreadth for fear of interfering with the man's aim.

Several persons from inside the hotel, having heard a shot, came out to discover who had been killed. They arrived just in time to see the second shot and the top of the bowl of my pipe cut off. They at once took in the situation, and, seeing me coolly puffing, not knowing my internal condition, they cried out, "Good pluck, stranger!" "Steady nerve!" "He ain't no tenderfoot!" and such like compliments.

Presently a third shot shattered what was left of the bowl of my pipe, and only the stem remained in my mouth. Whether my nerve made Barker half ashamed of himself or that he was headed off by the admiration of the others I don't know, but he desisted from further shooting. I fancy, how-

Daisy desires."

Without waiting for more he turned about and rode back in the direction from whence he came.

The next day Uncle Jake informed me that Barker had gladly agreed to the terms.

On the appointed day I made my appearance at the barn, wondering what was to be the upshot of this singular contest. I found an egg suspended over a basket by a fine thread. I won the toss and with it the right to fire five consecutive shots at the egg. I missed the first and the fourth, but put a hole in the egg on the second, third and the fifth. For my life I could not see why I had not lost. It would be nothing for Barker to hit the egg every time.

A new egg was attached to the thread for him to shoot at, and, whipping out his revolver, he fired with apparent carelessness. He was surprised to see the egg oscillate violently, but the shell was not broken. The next time he fired he took careful aim, but with no better success. He was thunderstruck. Since I had hit the egg three times he could now only tie me.

"You must hit it in the center," said Uncle Jake. "If you don't you'll glance."

Barker aimed long and carefully at the center and sent the egg bobbing, but still the shell was unbroken. Flinging his revolver on the barn floor, he strode away.

I knew that Barker had been tricked, but could not conceive how. It appeared to me that nothing could be more fair than the trial. I asked Uncle Jake how he had managed to

WANTS HER LETTER PUBLISHED

For Benefit of Women who Suffer from Female Ills

Minneapolis, Minn.—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women I felt sure it would help me, and I must say it did help me wonderfully. My pains all left me. I grew stronger, and within three months I was a perfectly well woman."

"I want this letter made public to show the benefit women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. JOHN G. MOLDAN, 2125 Second St., North, Minneapolis, Minn.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

me, a poor shot, beat the best shot in the territory. He would not tell me. Barker was never seen there again. Daisy had induced him to sign a promise that if I beat him he would leave the field clear for me.

I married Daisy and took her east with me. She said she had had enough of the wild west and had no further use for cowboys, not considering them the romantic creatures she had thought them when she first went to the country. She learned the secret of the shooting match from Uncle Jake the day we were married and told it to me on our wedding journey. The meat had been taken from the egg Barker shot at, and the featherweight shell had been moved aside each time by the wind of the ball. To hit it was impossible.

Uncle Jake had learned the trick from a prestidigitator who had passed through the locality with a circus.

THEIR FATHERS.

All Three Were Trimmers, but One Was a Star.

The story, long since familiar, of the little boy whose boast that his father had put a cupola on his house was capped by his playmate, who remarked proudly that his father had just put a mortgage on theirs, is brought to mind by an occurrence which was told the other day by a prominent politician.

The small son of a man who was in politics for revenue only on moving into a new district went out and struck up an acquaintance with two other kids of the same age who lived in the neighborhood. They were interested in the newcomer and began to try him out as to what his parents amounted to anyhow.

"My father is a window trimmer and an awfully big man," said the first kid.

"Ah, that's nothin'!" said the second. "My father's a dump trimmer, and he's twice as big as yours."

It was plainly up to the stranger to make good. And he did it with much gusto.

"My father is a politician," he said, "but I heard a man tell him last night that he was the biggest trimmer in this ward."

And it was apparent to any one that the new kid had made a strong impression upon the neighborhood.—New York Herald.

Wood Too Hard to Burn.

There are certain kinds of wood that are too hard to burn or refuse to ignite for some other reason, such as ironwood and the good briar root, but it is a curiosity to come across a piece of common deal—the soft, light wood of which so many boxes are made—that cannot be set fire to. The piece of wood in question was common white deal from Sweden, but was remarkable for its comparative weight. It had formed part of a boat belonging to a whaler and had been dragged below the surface of the water to the depth of more than half a mile by a harpooned whale. The length of line and the short distance from the point of descent after being struck at which the whale rose to the surface was a proof of the depth to which it had dragged the boat. Only part of the boat came up again at the end of the line, and it was taken on board when the whale had been killed. That piece of wood was so hard that it would not burn in a gas jet. The weight of water had compressed it.—London Standard.

They Were "Over."

He was a regular patron of the restaurant. Perhaps that is why he felt justified in making clever remarks to the waitresses, remarks which they were nuzzled to know how to answer

WILTON.

For last week.

Notwithstanding the inclemency of the weather, Monday evening, there was a fairly good attendance at the "At Home" in the Presbyterian church. The Odessa orchestra furnished a generous amount of excellent music, while the choir added some numbers, and Mrs. MacInnes pleased all with her rendition of "Ye Banks and Braes." Rev. W. S. P. Boyce, B. D., and Rev. J. P. MacInnes, chairman, gave very interesting addresses. Cake, sandwiches and coffee were served by the ladies. The collection, in aid of the organ fund, amounted to over \$18.

D. A. Nesbit, I. P. S., held meetings at Wilton and Thorpe schools on Wednesday and Friday respectively of last week to consider the cost and benefits of sustaining a continuation class at Odessa school, but most of the ratepayers seem satisfied with the convenience of Newburgh school, without incurring any further expense.

Mr. and Mrs. Ira Davison and children, Oxbow, Sask., who have been visiting friends in this and neighboring villages, left for their home on Monday.

Alfred Miller, Sandhurst, was in Wilton last Tuesday.

A large load attended Murvale carnival, Tuesday evening of last week.

STANLEY AS A FIGHTER.

His Revenge on the Africans For Attacking His Forces.

In the following language Sir Henry M. Stanley describes an attack of natives upon his party during one of his African expeditions: "The Leviathan bears down on us with racing speed, its consorts on either flank spouting the water into foam and shooting up jets with their sharp prows. A thrilling shout from 2,000 throats rises louder and louder on our bearing. Presently the poised spears are launched, and a second later my rifles respond with a ripping crackling explosion, and the dark bodies of the canoes and paddlers rush past us.

"For a short time the savages are paralyzed, but they soon recover. They find there is death in those flaming tubes in the hands of the strangers, and with possibly greater energy than they advanced they retreat, the pursued becoming the pursuers in hot chase. My blood is up. It is a murderous world, and I have begun to hate the filthy, vulture-like shoals who inhabit it.

"I pursue them upstream, up to their villages. I skirmish in their streets, drive them pell-mell into the woods beyond and level their ivory temples. With frantic haste I fire their huts and end the scene by towing their canoes into midstream and setting them adrift."

RAVENOUS EATERS.

Gluttony of Soliman and the Appetite of Louis XIV.

Touching the matter of eating, the stories told by the old chroniclers and historians of the abnormal appetites of certain Roman and oriental men of note fairly stagger belief.

Gibbon tells of Soliman, a caliph in the eighth century, who died of acute indigestion in his camp near Chaleis, in Syria, just as he was about to lead an army of Arabs against Constantinople. He had emptied two baskets of eggs and figs, which he swallowed alternately, and the repast was finished with marrow and sugar. In a pilgrimage to Mecca the same caliph had eaten with impunity at a single meal seventy pomegranates, a kid, six fowls and a huge quantity of the grapes of Taff.

Such a statement would defy belief were not others of a similar character

DESERONTO.

Feb. 19.—The Adolphustown hockey team played a return game on Monday evening on Bruyea's rink and were defeated by a score of 7 to 3. The T. A. S. hockey team, of Belleville, met the local team, on Thursday evening on Bruyea's rink, and was defeated by a score of 5 to 2. The high school hockey team played a game against the bankers on Wednesday evening, the high school coming out victorious.

Miss Laura Moore is in Toronto attending the millinery openings.

Miss Ella Joyce left this week for Toronto after having spent a few months with her parents Mr. and Mrs. John Joyce, Green street. She has accepted a position in St. Catharines for the spring season of millinery.

Miss Harland has taken the store lately occupied by Miss Vanastine.

P. Slavin & Co. have taken the store, corner of Green and St. George streets, formerly occupied by Frank T. McMaster.

Fred Sexsmith has bought the grocery business of Mrs. L. Werden.

A tea will be given at the home of Mrs. W. J. McMicking, on Tuesday afternoon in aid of church of the Redeemer.

Mrs. Charles Bruyea went to Hotel Dieu on Wednesday to undergo a serious operation.

Miss Lottie Brown went on Friday to Belleville hospital.

Mrs. Roy Moore and little daughter, of Nanapene, spent a few days with her mother, Mrs. Edward Bruyea, Sr.

Mrs. P. Fox accompanied Mrs. C. Bruyea to Kingston on Wednesday.

Mrs. P. Slavin is to reside on Green-side in the property of E. J. Evans.

After a lingering illness of five years there passed away on Thursday, Feb. 17th, Mrs. Elizabeth Collier, relict of the late Ellis Collier, of South Bay, aged seventy-four years, at the home of her daughter, Mrs. M. J. McFaul. She is survived by five children, two boys and three girls. The funeral was held on Saturday, service being conducted by Rev. G. H. Copeland, of the Methodist church, of which deceased was a member. The remains were placed in the vault at Deseronto cemetery.

Sensible Sandy.

While passing by an old fashioned inn in Scotland the tourists were attracted by an ancient bagpiper, who was tooting atrocious sounds through an instrument that was both dilapidated and squeaky. "Great Jericho, Sandy!" exclaimed one in desperation. "Why don't you have your bagpipes repaired?" And the old man ceased playing and looked up in astonishment. "Havers, mon, ye dinna understand! If ma bagpipes wor in good tune the inn mon winna give me 2 shillings to move on."

Wind Velocity.

The majority of people are unable to determine the wind's velocity. When the smoke from a chimney moves in a straight, vertical column, it means that a one to two miles an hour breeze is blowing. A three miles an hour wind will just stir the leaves on the trees. Twenty-five miles an hour will sway the trunks; at forty the small branches will break, and it takes a mile a minute gale to snap the trunks of big trees.—London Answers.

MAN-A-LIN

Copyright 1906, by The Manalin Co.

MAN-A-LIN Is An Excellent Remedy for Constipation.

There are many ailments directly dependent upon constipation, such as biliousness, discolored and pimpled skin, inactive liver, dyspepsia, over-worked kidneys and headache.

Remove constipation and all of these ailments disappear.

MAN-A-LIN can be relied upon to produce a gentle action of the bowels, making pills and drastic cathartics entirely unnecessary.

A dose or two of Man-a-lin is advisable in slight febrile attacks, la grippe, colds and Influenza.

They Were "Over."

He was a regular patron of the restaurant. Perhaps that is why he felt justified in making clever remarks to the waitresses, remarks which they were puzzled to know how to answer. One day, however, the smallest and timidiest girl happened to be serving this irritating customer, and it fell to her to answer him in kind.

"I'll have some steak," he said, coming in late for dinner, "and some squash, and some— Got some baked potatoes, fine, brown baked potatoes?"

"Baked potatoes are all over," said the girl.

He leaned back in his chair and gazed at her quizzically.

"Baked potatoes all over, are they?" he replied. "All over what?"

"With," she replied simply.—Youth's Companion.

Chivalrous Johnnie.

"What's the matter, dear?"

"I have just had a fight with Johnnie over dividin' the candy you gave us."

"Was there no one to take your part?"

"Yes'm; Johnnie took it."—Houston Post.

A Crucifix.

Katie—What a lovely ring! Matie—Isn't it? This ring was given me on my twenty-first birthday. Katie—Really? Why, how well preserved it is! It's hardly a bit worn!—Cleveland Leader.

Her Choice.

"May I offer you my umbrella and my escort home?"

"Many thanks. I will take the umbrella."—Fliegende Blatter.

A Jolt For the Doctor.

Among the patients in a certain hospital there was recently one disposed to take a dark view of his chances for recovery.

"Cheer up, old man!" admonished the youthful medico attached to the ward wherein the patient lay. "Your symptoms are identical with those of my own case four years ago. I was just as sick as you are. Look at me now!"

The patient cast his eyes over the physician's stalwart frame. "What doctor did you have?" he finally asked feebly.

Making Sure.

Some years ago there was a trial for murder in Ireland in which the evidence was so palpably insufficient that the judge stopped the case and directed the jury to return a verdict of not guilty.

A well-known lawyer, however, who wished to do something for the fee he had received for the defence, claimed the privilege of addressing the court.

"We'll hear you with pleasure, Mr. B.," said the judge, "but to prevent accident we'll first acquit the prisoner."

Advice.

"Nobody listens to advice."

"You're wrong. One fellow always does."

"Who's that?"

"The fellow who's giving it."—Cleveland Leader.

No Difference.

CASTORIA

ple. He had emptied two baskets of eggs and figs, which he swallowed alternately, and the repast was finished with marrow and sugar. In a pilgrimage to Mecca the same caliph had eaten with impunity at a single meal seventy pomegranates, a kid, six fowls and a huge quantity of the grapes of Tayef.

Such a statement would defy belief were not others of a similar character well avouched. Louis XIV could hardly boast of an appetite as ravenous as Soliman's, but he would eat at a sitting four platefuls of different soups, a whole pheasant, a partridge, a plateful of salad, mutton hashed with garlic, two good sized slices of ham, a dish of pastry and finish this ample repast with fruit and sweetmeats.—London Saturday Review.

Victorian Gods.

If Thackeray, with a brain weighing fifty-eight and one-half ounces, had the biggest head among Victorian writers who had the best features? The choice would seem to lie between Tennyson and Henry Taylor. "That man must be a poet," remarked one of his Cambridge contemporaries when he first saw Tennyson come into the hall at Trinity, and another friend deserted him in his undergraduate days as a foot high, broad chested, strong limbed, his face Shakespearean, with deep eyelids; his forehead ample, crowned with dark wavy hair; his head finely poised, his hand the admiration of sculptors. But time dealt none too gently with Tennyson, whereas Henry Taylor, always a distinguished looking man, seems to have grown singularly majestic with years. Grant Duff, meeting him when he was over eighty, notes that "Taylor looks more like Jupiter than ever," and contemporary memoirs are full of references to his Jove-like appearance.—London Standard.

May I offer you my umbrella and my escort home?"

"Many thanks. I will take the umbrella."—Flegende Blatter.

Perfect Safety and Perfect Satisfaction.

You're not safe from the tortures of scraping with so-called "safeties." The only perfect shaving safety and perfect shaving satisfaction lies in using the old reliable.

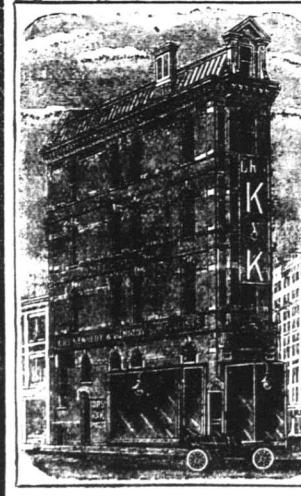

WISS
RAZOR

WISS RAZORS are the most perfect that can be produced. Choose the style suited to your beard, and you'll have no more shaving troubles. We carry a complete assortment from \$1.50 to \$3.50, every one fully guaranteed. Get one today.

M. S. Madole, Napanee.

FINEST MEDICAL INSTITUTE IN AMERICA OWNED AND OCCUPIED BY DR. K. & K.

YOUNG OR MIDDLE-AGED MEN
who need the services of expert specialists
why waste your money in treating with
doctors you know nothing of, why waste
your money with worthless electric belts
or drug store nostrums, when you can get
guaranteed, reliable, successful treatment
from these Master Specialists, Drs. K. & K.
have treated thousands of cases in Canada
for over 20 years and are responsible finally.
They accept only curable cases and
should your case prove incurable it need
not cost you a cent. If you are unable to
call at our office for a personal examination
we will send a Question List for you to fill up
from which we can diagnose your case and
tell you whether you are curable or not.
Then we will prescribe specific remedies
for your individual case which you can
have at a nominal cost. We have no other remedy
that is equal to every body like the
specialists do but we prescribe the remedies
required for each individual case to
complete a cure. That's one of the secrets
of our wonderful success when others fail.
Send for our Free Booklet on Diseases of
Men Illustrated.

CURES GUARANTEED OR NO PAY

We Guarantee to cure
Nervous Debility, Blood Diseases, Varicose
Veins, Kidney, Bladder and
Urinary Diseases
CONSULTATION FREE
If unable to call, write for a Question Blank
for Home Treatment

MILES MCKEOWN, Despatcher.

THE SUFFERING WOMAN ENDURES

Can be Banished by the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

Behind the veil of her modesty and silent patience nearly every woman endures suffering that casts a shadow over half her existence. An aching back, tired limbs, attacks of faintness, and headache upon headache need not be part of a woman's life. Such trials indicate plainly that the system requires the new blood that is supplied by Dr. Williams' Pink Pills.

These Pills are valued by suffering women, who have used them, above all other medicines, because they make the rich, red blood that makes women well, bright and at their best. This is the secret of the great success of Dr. Williams' Pink Pills.

Mrs. Geo. C. Wadden, Wadden's Cove, N. S., says: "A few years ago I was completely run down. At times I would be so weak that I was unable to do my housework. I suffered from severe headaches, pains in the back and dizziness, and at times I felt as though life was scarcely worth living. I had tried several medicines without getting relief, when I finally decided to give Dr. Williams' Pink Pills a trial.

After using two or three boxes I noticed change, and after taking the Pills about two months I was again enjoying good health, and have since been well and strong. I can confidently recommend Dr. Williams' Pink Pills to all weak and rundown women."

You can get this great blood-building, health restoring medicine from any dealer in drugs, or the Pills will be sent by mail at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

SELF-MADE MARTYRS.

"What's a martyr, father?" asked the only scion of the Morse household, aged eight. Mr. Morse answered him with deliberation.

"There aren't many now-a-days, sonny," he said, "excepting self-made ones."

"What are they?" persisted Ned.

"I couldn't name all the varieties to you," said Mr. Morse, "but to give a general instance. Ned, they are the people who wear heavy hats because they are the fashion, and then suffer from headaches."

"And the people that go without overcoats, Ned, because it is considered the thing to do, and then have stiff backs," said Mrs. Morse, sweetly.

"And those that accept office as treasurer of a society for the honor of it, when it takes them an hour to add seventeen and forty-three," said Mr. Morse.

The boy looked puzzled, and he was not enlightened when his mother said:

"And those who are growing a little deaf, like me, Ned. I don't always catch even what your father says."

Then the heads of the Morse household broke into one of those laughs which Ned could never understand, and which came without apparent cause.

A MESSAGE OF HOPE
TO WORRIED MOTHERS

THE MYSTERY CLEARED UP:

OR, THE HERITAGE OF MADAME YALTA.

CHAPTER II.—(Continued.)

The child uttered a cry of joy. She came toward them, and extending her hand to her cousin, inquired for the health of the poor boy.

"He is very well," replied Maxime. "I went to his grandmother's for him, and am taking him to walk by way of diversion. See what a good boy I am become. May I ask where you are going?"

"It is a secret," replied Alice, "but I will take you into my confidence. I am going to sit for my portrait. It is to be a surprise for my father."

"Where does your artist live?"

"Corner or Rue de Lisbonne and Rue de Courcelles. If you take Georget back to his grandmother, it is almost your route; will you come with us?"

"And you can tell us on the way about a lady who is dying to know my pupil—the Countess Yalta."

"The Countess Yalta!" repeated Maxime, who little expected to hear Madame Martineau pronounce this name.

"Yes, sir, this noble lady came to your uncle's an hour ago, and has expressed a desire to see your cousin. M. Dorgeres did his best to decline the honor she wished to confer on his daughter. He is of

the opinion that a foreigner who drives four horses is not the most suitable associate for a young lady. But the countess insisted so, that he was compelled to put her off with some evasive reply. So she left, saying she would return. We have been at a loss to account for this passion for Alice, and hoped you might have the answer to the riddle. Between ourselves, your uncle thinks she is crazy."

Maxime was not quite of this opinion, but he was amazed that the countess whom he had left extended on a couch had so soon after driven out in spite of the orders of Dr. Villagos.

"See here, my dear Alice," he said, after a pause, "you know that Jules Vignory is my friend and cannot surely suspect me of a desire to injure him. Well, honesty obliges me to tell you that the countess undertakes to establish the innocence of M. de Carnoel."

Alice turned pale and made no reply, but Madame Martineau exclaimed: "What concern is it of this stranger's? And you, sir, cannot you see that you distress your cousin by recalling a past that she voluntarily ignores? And you must acknowledge that it sounds strange to hear you undertake the cause of a man whom you were the first to accuse."

"I do not defend him; it is the countess who does. I seek only for the truth. She is convinced that M. de Carnoel is innocent, and that if he has not shown himself for a month past, it is because he has fallen into the hands of those who were interested in preventing him from doing so."

"It is absurd," cried the gover-

nor to whom it belongs?"

"No; yet I fancy I have been in there."

"I shall find out," thought Maxime, whose curiosity began to awaken.

"Wh y did you go there?" he resumed aloud. "To take a letter from the office, perhaps?"

"No, I am sure it was not that; I didn't set foot in Rue de Seresnes that day."

"Here is the Boulevard de Courcelles where you were picked up," he said, pointing to a street which bordered a long wall.

As soon as they passed the corner which bore the municipal placard, the child's eyes brightened, and he exclaimed:

"It was here. I recognize the place. Come, I will show it to you."

After having run about twenty yards Georget stopped.

"Do you see this wall? Well, I fell from there."

"Are you sure of that?"

"Very sure. See, there is some plaster work that has been detached. I struck my head on this large stone at my foot."

"It was not here, however, that you were found. You were lying on the road across the rails of the tramway."

"Some one must have taken me there. I don't remember anything after I made the somerset."

"But why did you climb on the wall?"

"To see what was on the other side."

"And what did you see?"

"Nothing; it is night now."

Maxime made a movement of impatience, but he controlled himself.

"How, diabol! did you get up there?"

"I believe it was with a cord. Yes, that was it—a cord with knots, and a hook at the end."

"And where did you get the cord?"

"I have forgotten; but I answer for it that I made use of a knotted cord. It must have broken when I was getting down."

"Let us see, my little Georget. Try to remember once more. You had some idea when you tried to scale the wall?"

"No doubt, but I have forgotten what."

"Think. Take time, and don't be frightened if I press you a little. I am not Vignory, and have no orders to give you. I am your friend as M. de Carnoel was."

Aladdi, in the "Thousand and One Nights," must have been amazed at the appearance of the genie his rubbing had evoked. Maxime Dorgeres was not less so when Georget exclaimed:

"M. de Carnoel! It was he! I was looking for him when I climbed up there."

"You knew, then, that he was in that house?" asked Maxime, quickly.

"It is absurd," cried the gover-

SUFFERED FOR SIX LONG YEARS

THEN DODD'S KIDNEY PILLS CURED MRS. RICHARD'S DIABETES.

Her Rheumatism also Vanished When Dodd's Kidney Pills Put Her Kidneys in Condition to do Their Work.

East Chezzetcook, Halifax Co. N. S., Feb. 7.—(Special)—Cured of Diabetes and Rheumatism from which she had suffered for six years, Mrs. Boniface Richard, well known here, is joyfully telling her neighbors that she owes her health to Dodd's Kidney Pills and to no other cause.

"My Rheumatism and Diabetes were brought on by cold and a strain, and though I was attended by a doctor he could not help me. After suffering for six years I made up my mind to try Dodd's Kidney Pills and to my surprise they did me good almost at once. Two boxes cured me completely. I recommend them to everybody as a cure for Diabetes, Backache and all other Kidney Diseases."

Dodd's Kidney Pills cured Mrs. Richard's Diabetes because Diabetes is a Kidney Disease, and Dodd's Kidney Pills cure all Kidney Diseases. Mrs. Richard's Rheumatism was caused by her diseased Kidneys failing to take the uric acid out of her blood. When her Kidneys were cured they strained the uric acid out of her blood and her Rheumatism vanished.

The colonel blew out a long puff of Turkish-tobacco smoke, let fall his marble pipe, and said, somewhat languidly:

"What is the Frenchman doing now?"

"He is asleep, your excellency."

"Or pretends to be. What has he talked about this morning?"

"Of nothing, your excellency. He makes no reply when I inquire for his health."

"Is it good?"

"Very good, excellency. He is scarcely altered. The man is sustained by an iron will."

"Say rather that he is headstrong; that, having reflected upon the situation, he has determined upon silence at whatever cost. Of two evils that threatened he has chosen the lesser."

"It seems to me that if you dispatched him to Siberia his fate would be no enviable one. I hardly see what worse could befall him."

"Varilli, you have no commensense."

"I beg pardon, your excellency; but it seems to me, if this young man could avoid this journey by delivering up the names of his accomplices, he would do well. He has sense enough to understand that it is the only way out of the difficulty."

"Yes, but he has sense enough to know too that those he had betrayed would never forgive him. He knows they have no mercy for traitors. He cannot be ignorant of the history of Serge Lawrowski. It happened only last year at Pultawa. Did you know this Lawrowski?"

"Yes, your excellency. He was one of the most skilful agents of the political police."

little deal, like me, Ned. I don't always catch even what your father says."

Then the heads of the Morse household broke into one of those laughs which Ned could never understand, and which came without apparent cause.

A MESSAGE OF HOPE TO WORRIED MOTHERS

There is no other medicine can equal Baby's Own Tablets for the cure of stomach, bowel and teething troubles. They come as a message of hope to worried mothers as they make sickly, peevish, crying children bright and well. And the mother has the guarantee of a government analyst that this medicine contains no opiate, or poisonous soothing stuff. Mrs. Maurice Murphy, Glenford, Ont., says: "I think Baby's Own Tablets the best medicine in the world. I know of nothing that can equal them in curing stomach, bowel and teething troubles." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WOMANLIKE.

Nell—You should have heard what George said when he proposed to me.

Bell—You should have seen how he acted when I refused him.

Only those who have had experience can tell the torture corns cause. Pain with your boots on, pain with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure.

"Let 'em! We'll build a fleet of torpedo destroyer destroyer destroyers."

Put up in 51 Yard Rolls. The famous "The D & L" Mouth Plasters. They come in jumbo, backache, solution, neuralgia, etc., are always put up in one yard rolls for physicians and family use. Davis & Lawrence Co., Montreal.

NOT A DISTURBER.

Lady Visitor—That new girl of yours seems very nice and quiet.

Mistress—"Yes, she's very quiet. She doesn't even disturb the dust when she's cleaning the room."

TO CURE A COLD IN ONE DAY

Take TAXAATIVE EROMO. Quinine, Iodine, Druggist's remedy if it fails to cure. E. W. GROVES' signature is on each box.

CAUTION.

"Lizzie," said the young mistress, "I have been breaking into the kitchen, and I am shocked to note your carelessness."

"Carelessness, mum," says Lizzie. "Well, if there's a cleaner kitchen than this in town, I'll—"

"Oh, it is clean enough, as far as that goes. But this morning I noticed that you are leaving the box of matches right beside the can of gunpowder tea."

TAKE A DOSE OF PISO'S CURE

THE BEST MEDICINE FOR CURE

It will instantly relieve that racking cough.
Taken promptly it will often prevent
Asthma, Bronchitis and serious throat and
lung troubles. Guaranteed safe and very
palatable.

All Druggists, 25 cents.

LIFE IN GILBERT ISLES.

Effects of Civilization on the Natives.

Some curious effects of civilization are related in a Government report on a visit to the scattered Gilbert Islands in the South Pacific, annexed by Great Britain in 1892, says The London Daily Mail. The results may be summarized as follows:

Advantages: Wars have ceased; the islands are kept in perfect order; extreme poverty is almost unknown; every man is secure in his possession of his piece of land; taxes are light and arouse no complaints; the native police are efficient and the native officials admirably honest; the houses are good, the roads clean, and hospitals have been established.

Disadvantages: Life is extremely monotonous and circumscribed, intercourse between the islands being forbidden; the old Spartan simplicity of living—chiefly on cocoanuts and fish—has vanished, and rice, meat, sugar, and biscuits are consumed; "clothes of shocking shape and atrocious color have almost replaced the picturesque kilt of leaves"; native arts and crafts have rapidly declined; decrease of population has set in and the number of sterile marriages is growing quickly; new diseases have been imported, and there is an alarming increase of phthisis.

The islands are of coral, and the highest land is not more than 20 feet above high-water mark. The natives consume daily about seven cocoanuts per head. They have a Parliament of unpaid members known as kaubure or "talking men," the Gilbert Islanders being, in spite of the scarcity of topics, "the most wonderful talkers in all the South Seas." "The eternal land problem" is the ever-fruitless theme of endless discussion.

ZAM-BUK CURES PILES.

Evidence From All Sources.

Piles are caused by distension of the hemorrhoid veins, and the tissue becomes highly inflamed, dry and sore. Zam-Buk cools and soothes the inflamed tissue and the healing essences in Zam-Buk penetrate the diseased parts, giving ease quickly.

Mr. George Harris, of Virden, Man., says: "I suffered acutely from piles, but I am glad to say Zam-Buk worked a complete cure."

Mrs. S. Cooke, 468 Pacific Ave., Winnipeg, says: "A month ago I was cured by Zam-Buk of a bad attack of bleeding piles, to which I had been subject for a long time."

Mr. William Kenty, of Upper Nine Mile River, Hants Co., N. S., says: "I suffered terribly from piles. The pain from these was not times almost unbearable. I tried

THE EXPLANATION.

Mrs. Youngbride — Mrs. Smith says there is lots of cream on her milkbottles every morning. Why is there never any on yours?

The milkman—I'm too honest, lady, that's why. I fill my bottles so full that there ain't never no room left for cream.

INTERESTING.

"You say that psychic research has led you to some interesting discoveries?"

"Yes," answered Mr. Lobrow. "I had no idea before that so many of my ancestors played the tambourine and guitar."

SAME HOUSE.

Two wretched-looking tramps were brought before the magistrate.

Addressing the worse-looking of the two, he said:

"Where do you live?"

"Nowhere, sir."

"And where do you live?" addressing the second.

"I've got the room above him, your worship."

A GOOD COUGH MIXTURE.

Simple Home-Made Remedy That is Free From Opiates and Harmful Drugs.

An effective remedy, that will usually break up a cold in twenty-four hours, is easily made by mixing together in a large bottle two ounces of Glycerine, a half-ounce of Virgin Oil of Pine compound pure and eight ounces of pure Whisky. This mixture will cure any cough that is curable, and is not expensive, as it makes enough to last the average family an entire year. Virgin Oil of Pine compound pure is prepared only in the laboratories of the Leach Chemical Co., Cincinnati, Ohio.

HIS EGG PRODUCER.

Ashley—"I suppose you remember that wonderful White Leghorn hen of mine?"

Selmour—"Yes; what about her?"

Ashley—"I want to tell you about her laying; it's something remarkable; why, some days last summer she laid more eggs than all my other hens put together."

Seymour—"What was the matter with the other hens?"

Ashley—"They were sitting."

PILES CURED at HOME by

New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 719, Windsor, Ont.

TIME AND MONEY.

If time is money, as they say, it is surprising strange,

Garden Freshness of "SALADA"

Fresh and fragrant from the gardens of the finest tea-producing country in the world. Ask your grocer for a package to-day — you'll like it.

For PINK EYE

DISTEMPER
CATHERAL FEVER
AND ALL NOSE
AND THROAT DISEASES

Cures the sick and acts as a preventive for others. Liquid given on the tongue. Sale for brood mares and all others. Best kidney remedy; 50c and \$1 a bottle; \$5 and \$10 the dozen. Sold by all druggists and horse goods houses. Distributors: All Wholesale Drug Houses.

SPOHN MEDICAL CO., Chemists, GOSHEN, INDIANA, U. S. A.

MAPLEINE

A flavoring used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not sold for 7 oz. bottle and recipe book. Crescent Mfg. Co., Seattle, Wash.

WALKING OR CUTTING GUITS

PILES

Blind, Bleeding, Itching, Protruding Piles quickly and permanently cured by the most scientific and economical remedy.

LYLE'S COMMON SENSE FOR PILES Price \$1.00-6 for \$8.00 mailed on receipt of price.

LYLE MEDICINE CO., 718 Queen West, TORONTO.

APPENDICITIS

Cured without operations. All who are affected with this disease and wish to be cured permanently, safely and quickly by this great Homeopathic remedy, which will be sent post-paid anywhere in the world with full instructions for using it to effect a permanent cure. Price \$1. Address John T. Walt, Homeopathic Pharmacy, Arnprior, Canada.

Mrs. S. Cooke, 468 Pacific Ave., Winnipeg, says: "A month ago I was cured by Zam-Buk of a bad attack of bleeding piles, to which I had been subject for a long time."

Mr. William Kenty, of Upper Nine Mile River, Hants Co., N. S., says: "I suffered terribly from piles. The pain from these was not times almost unbearable. I tried various ointments, but everything failed to do me the slightest good. I was tired of trying various remedies, when I heard of Zam-Buk, and thought, as a last resource, I would give this balm a trial. In a very short time Zam-Buk effected what all the other ointments and medicines had failed to do—a complete cure."

Wherever there is inflammation or ulceration, there Zam-Buk should be applied. It heals ulcers, abscesses, festering sores, cold cracks, scalp sores, cuts, burns, scalds, bruises, etc. All druggists and stores, 50 cents a box, or post free from Zam-Buk Co., Toronto, for price. Refuse substitutes.

DOMESTIC.

"Name the domestic animals?" asked the teacher one afternoon, when she was giving her small pupils a quiz.

Philip frowned, sucked his pencil, and then manfully did as he was told.

"The cat, the dog and the hired girl," he wrote in his big, round hand.

One of the greatest blessings to parents is Mother Graves' Worm Exterminator. It effectually expels worms and gives health in a marvellous manner to the little one.

LEARNING MAN'S WAYS. And now the female "highwayman."

At robbing takes her fling. Soon woman will compete with man In ev'ry single thing.

The Best Liver Pill.—The action of the liver is easily disarranged. A sudden chill, undue exposure to the elements, over-indulgence in some favorite food, excess in drinking, are a few of the causes. But whatever may be the cause, Parmelee's Vegetable Pills can be relied upon as the best corrective that can be taken. They are the leading liver pills and they have no superiors among such preparations.

HELPFUL.

Husband—"Have you don your best to economize this month, Mary, as I requested?"

Wife—"Oh, yes; I spoke to the grocer, the butcher, and the landlord, and got them to put off presenting their bills until next month."

There's nothing so cheap as a cheap man.

Many a married man is entitled to a hero medal.

A bore is a person who has nothing to do but sit around and visit.

The charity of some men consists of a willingness to pass the hat.

Most of a man's friends are of the distance variety.

Kindly mention the name of this paper in writing to advertisers.

ferences from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 719, Windsor, Ont.

TIME AND MONEY.

If time is money, as they say, it is surprising strange. That for a half hour we delay, To get 2 cents in change.

Free to Our Readers.

Write *Murine Eye Remedy Co., Chicago, for 48 page Illustrated Eye Book Free. Write all about Your Eye Trouble and they will advise as to the Proper Application of the Murine Eye Remedies in Your Special Case.* The Druggist will tell you that Murine Believes Sore Eyes, Strengthens Weak Eyes. Doesn't Smart. Soothes Eye Pain, and sells for 50c. Try it in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

A fool and his money are soon parted, but it's different with a lazy boy and a warm bed.

PILE CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blisters, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

English Tourist—"Waiter, bring me some sugar, please." Wild West Waiter—"There ain't but three lumps in the house, captain. You kin have them as soon as them gents git through with 'em; they've got 'em marked, and they're shaking dice with 'em."

"Tis Well to Know a Good Thing, said Mrs. Surface to Mrs. Know-well, when they met in the street. "Why, where have you been for a week back?" "Oh, just down the store for a bottle of Dr. Thomas' Electric Oil," and Mrs. Surface, who hates puns, walked on. But she remembered, and when she contracted a weak back there was another customer for Electric Oil.

Some men boast of their luck because none of their relatives ever visit them.

DON'T WAIT until your neighbor is getting better crops than yourself. GAO, KEITH & SONS, Seed Merchants, Toronto, are offering O.A.C. No. 21 Barley and Scotch grown Regenerated Banded Oats, in 5 bush. lots, at \$1.25 per bush. bag FREE. Send for samples, also catalogue.

People who take pains to tell the truth on all occasions have but few friends.

For Shingles, Frost Bites, Bruises, Sprains, nothing equals the famous old remedy, Perry Davis' Paintkiller. Keep a bottle always on hand. Equally good to check Chills and break up Olds. At all druggists.

WHERE WILL IT STOP?

"Our fleet of torpedo destroyers seems to have stirred up our friend the enemy," remarked the naval chief of one great power.

"Yes," replied his assistant, "it is said they will build a fleet of torpedo destroyer destroyers now."

Regularity

of the bowels is an absolute necessity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, indigestion and sick headaches. Salts and other harsh purgatives irritate the delicate lining of the bowels. Dr. Morse's Indian Root Pills—entirely vegetable—regulate the bowels effectively without weakening, sickening or griping. Use

TWO DEAD, MANY INJURED

Serious Fire in the Gurney-Tilden Stove Works at Hamilton.

A despatch from Hamilton, Ont., says: Caused, it is presumed, by an electric spark igniting some chemicals in the lacquer room, fire broke out about 5.30 on Thursday evening in the enormous plant of the Gurney-Tilden Company, stove manufacturers, resulting in the death of two men, serious injury to three others, lesser wounds to about 150 startled employees, and hair-raising experience for them all.

The dead are:—Henry Bawden, foreman grinding-room; Albert McCully, helper in stove mounting room. The more seriously injured are:—Fred Wilds, hand and arms burned; S. Hobson, wrist broken; Percy Woodbridge, overcome by smoke.

To over 70 men caught in the upper storeys the only safe mode of escape was the greasy elevator cables, down which they swarmed, hand over hand, by dozens. Others could not maintain their hold and slid down like dead weights, landing on the head of the other men at the foot of the shaft. Bawden and McCully endeavored to reach another part of the building, but were overcome by the smoke, and were discovered, lying dead, half an hour later.

The exact cause of the fire has not been ascertained, but the fire department authorities believe that the electric wires, probably influenced by the fall of snow, became crossed and caused a spark. The location of the spark was the lac-

quer room, where there was stored a quantity of highly inflammable chemicals, which ignited in a burst of flame. The room is on the ground floor, and the men in that department had to do some quick stepping to reach safety. Inside of one minute the entire room was enveloped in a cloud of pungent smoke, which escaped to the upper floors via the elevator shaft and a flight of steps.

The grinding room on the third floor got most of the smoke. It was absolutely impossible to inhale the vapor and live, and the seven men and two boys who worked in the grinding room made quick dashes to liberty. The majority of them rushed to the windows, which they broke. S. Hobson and several others jumped and landed in a life-saving net held by the firemen. Others went down a ladder. Bawden and McCully tried to escape by staggering into a different part of the building. That was the last seen of them alive. Half an hour later their bodies were recovered by Fire Chief TenEyck and some of his men only a few feet outside the door of the room from which they had tried to escape. They had been overcome by the smoke and were carried downstairs, where Dr. James Anderson, aided by some firemen, with their first aid-to-the-injured outfit, worked long to restore them. Their efforts were fruitless, as the two unfortunate men were evidently dead before they were found.

THE FEDERAL LIFE.

Results of the Past Year Indicate Good Progress.

The annual report of the Federal Life Assurance Company of Canada contains very satisfactory indications of progress. The report, which is given in another place in this issue, shows new business consisting of 2,600 applications for insurance aggregating \$3,663,896.66, of which 2,501 applications for \$3,501,235 were accepted. As in previous years the income of the company shows a gratifying increase and the assets of the company have been increased by \$329,692.88 and have now reached \$3,643,949.53, exclusive of guarantee capital. The security for policyholders including guarantee capital amounted at the close of the year to \$4,513,349.53, and the liabilities for reserves and all outstanding claims, including \$20,000 set aside as a special addition to policy reserves, \$3,351,254, showing a surplus of \$1,162,695.53. Exclusive of uncalled guarantee capital, the surplus to policyholders was \$292,695.53. Death claims to the amount of \$200,406.07 were paid. Including cash, dividends and dividends applied to the reduction of premiums, with annuities the total payment to policyholders amounted to \$347,274.43. The assurances carried now amounted to \$21,049,322.31.

RIOTS IN PHILADELPHIA.

Disorders Accompanies Strike of Street Car Men.

A despatch from Philadelphia, Pa., says: Rioting in every section of this city followed the attempt of the Philadelphia Transit Company to operate its lines here on Sunday. Passengers and crews were driven from the cars by infuriated mobs of strike sympathizers and in nearly a score of instances the abandoned cars were buried or otherwise destroyed. At nightfall every car was withdrawn from service. Stern measures were adopted by the police to quell the disorders and nearly 500 persons were arrested, charged with inciting to riot. Two women were shot by stray bullets, and many people were removed to hospitals.

P. E. I. IS PROSPERING.

Department of Agriculture Reports Good Year.

A despatch from Charlottetown, Prince Edward Island, says: The public accounts presented in the legislature on Friday show the annual ordinary expenditure to be \$365,000; capital, \$28,000; ordinary revenue, \$275,000; total liabilities, \$83,000. The biggest item of expenditure was \$129,000, for education. The department of agriculture reported the year as exceptionally good, from an agricultural

IN PAIN FOR YEARS

"FRUIT-A-TIVES" BRINGS RELIEF

MRS. FRANK EATON

Frankville, Ont., Sept. 27, 1900.

"I suffered for years from headaches and pain in the back, and I consulted doctors and took every remedy obtainable without any relief. Then I began taking 'Fruit-a-tives', the famous fruit juice tablets, and this was the only medicine that ever did me any real good. I took several boxes altogether, and now I am entirely well of all my dreadful headaches and backaches".

(Signed) MRS. FRANK EATON.
5c a box, 6 for \$2.50 or trial box, 25c.
At dealers or from Fruit-a-tives Limited, Ottawa.

A BOYCOTT ON LIQUOR.

Socialists in Germany Object to Paying the Alcohol Tax.

A despatch from Berlin says: The Socialist boycott and increased taxes have reduced considerably the consumption of brandy in Germany. Since October 1 the production of alcohol in all forms has declined by 6,380,000 gallons. The Socialists are maintaining the boycott to prevent the empire from securing the intended revenue from the alcohol tax and to rob the agrarians of the benefits which they would secure through the special discrimination in their favor contained in the law.

MAD MULLAH ON WAR PATH.

Big Force of Dervishes Killing and Burning in Somaliland.

A despatch from Aden, Arabia, says: Mohammed Abdullah of Somaliland, the "mad" Mullah, is again on the warpath. A big force of dervishes has raided the Sultanate of the Mijertins, killing and burning in all directions. The slaughter of the tribesmen was very heavy. One whole town was gutted by fire and 11,000 camels taken by the dervishes. The administration of the Sultanate of the Mijertins is entrusted to the Government of Italian Somaliland.

RESCUING CHILDREN.

Several Narrow Escapes at a Fire in Ottawa.

A despatch from Ottawa says: Several inmates of an Italian bakery on Somerset street had a narrow escape when the premises were destroyed by fire on Sunday evening. The family of D. Sciarrooni, consisting of six children, were in bed when the fire started. They were rescued through a smashed window and handed down to helpers. Mrs. Sciarrooni jumped, and no one was injured. The fire itself did \$1,500 damage.

MISS MACPHERSON DEAD.

The Charge Against Robert Henderson Will be Murder.

A despatch from Peterboro' says: Miss Martha Macpherson, who, with her sister, was attacked in their little home in the township of Asphodel, three miles east of the village of Norwood, on January 27th, died on Sunday, and a charge of murder will likely be preferred against her alleged assailant, Robert Henderson, who is in jail here awaiting trial. The attack on the two women was made, it is alleged, by Henderson, who asked at the house for something to eat. He was told to cut some wood and went to the shed, but soon returned, and, it is claimed, used the axe on the two women. Miss Martha Macpherson since the alleged assault had been in a critical condition, and physicians were constantly in attendance. Robert Henderson, who is alleged to have been responsible for the woman's death, was committed for trial on the charge of wounding with intent to kill. Henderson was a resident of Toronto for a short time.

legislature on Friday show the annual ordinary expenditure to be \$265,000; capital, \$28,000; ordinary revenue, \$275,000; total liabilities, \$863,000. The biggest item of expenditure was \$129,000, for education. The department of agriculture reported the year as exceptionally prosperous from an agricultural standpoint. The value of the field crops was over \$9,000,000. The dairy industry increased 30 per cent. over 1905.

ADMITTED HE IS COOK.

Explorer First Refused to Recognize His Former Companion.

A despatch from Santiago, Chile, says: Dr. Frederick A. Cook on Friday admitted his identity. He visited his old comrade, the Belgian engineer Bysselburgh, and the two were together for some hours. The two men were members of the Belgian Antarctic expedition of 1897-98, and the engineer recognized Cook when they were fellow-passengers on the steamer from Valdivia. Until now, however, Cook had refused to recognize his former companion.

A company has been formed at Niagara Falls to build a railway to Niagara-on-the-Lake.

Fourteen immigrants held at Halifax for deportation by the immigration officials were released on a writ of habeas corpus.

were rescued through a smashed window and handed down to helpers. Mrs. Sciarroli jumped, and no one was injured. The fire itself did \$1,500 damage.

WONT DAM NIAGARA.

Decision of Waterways Commission is Against the Proposal.

A despatch from Buffalo says: The Express says: The proposal to dam Niagara River to raise the water level of the great lakes is disapproved by the international waterways commission in its report submitted to the secretary of war at Washington, and the minister of public works at Ottawa. The project has been under consideration for about ten years.

CANADA IN SECOND PLACE.

High Among Leading Countries in Increase of Trade.

A despatch from London says: According to the official return, Canada takes second place among the leading countries of the world in its percentage of increase in trade during the last decade.

MEDAL FOR REYNOLDS?

Name of Conductor in Webbwood Wreck Sent to London.

A despatch from Ottawa says: In the Senate on Wednesday Sir Richard Cartwright said that the Secretary of State had forwarded to the Imperial authorities details of Conductor Reginald L. Webb's conduct in the Spanish River railway wreck. As to Mrs. Lintell, while her courage, coolness, and conduct on that occasion were recognized, it was doubtful if her case came within the scope of the regulations governing the distribution of the Edward or the Albert medals. However, that would be investigated.

CAR PLUNGED DOWN BANK.

Narrow Escape of Two Passengers at London.

A despatch from London, Ont., says: Springbank car No. 109 with two passengers, Frank Elson and William Hart, of Byron, Ont., was badly wrecked at 7.29 o'clock on Thursday morning, when it left the rails at a point about half a mile west of the Wharncliffe road, and shot head foremost down an embankment into the river. No one was injured. The accident was caused by about half an inch of ice on the rails.

INSPECTION OF CANNED FISH.

Next Endeavor of Government to Ensure Pure Foods.

A despatch from Ottawa says: That an adequate system of government inspection of canned fish of all kinds, produced in Canada for export or interprovincial trade, similar to that exercised over canned meats, will shortly be established under the control of the marine department, is the statement made by Hon. Sydney Fisher, minister of agriculture.

John Miller was sentenced at Niagara Falls to three years in penitentiary, on Thursday, for robbing a jewellery store.

Mr. J. C. Eaton has given \$250,000 to the new Toronto Hospital.

per lb. in case lots; mess pork, \$27; short cut, \$28.50 to \$29.

Hams—Light to medium, 15 to 15½; dc; do, heavy, 14 to 14½; rolls, 14 to 14½; shoulders, 13 to 13½; breakfast bacon, 17 to 17½; backs, 18½ to 19½.

Lard—Tiers, 15½; tubs, 15½; pails, 16c.

BUSINESS IN MONTREAL.

Montreal, Feb. 22.—Oats—No. 2 Canadian Western, 45½ to 46c; No. 3, 44½ to 45c; Ontario No. 2 white, 43½ to 44c; Ontario No. 3 white, 42½ to 43c; Ontario No. 4 white, 41½ to 42c; Barley—No. 2, 59½ to 60c; No. 3, 58½c; No. 4, 59½c; feed barley, 50½c. Flours—Manitoba Spring wheat patents, firsts, 55.50; dc, seconds, 55.80; Manitoba Spring wheat patents, seconds, 55.30; Winter wheat patents, 55.50 to 56.00; Manitoba strong bakers, 55.10; straight rollers, 55.10 to 55.25; straight rollers, in bags, 52.10 to 52.50. Feed—Ontario bran, 822.50 to 823c; Ontario middlings, 823.50 to 824.00; Manitoba bran, 822.00; Manitoba shorts, 823.00; pure grain mouillie, 831 to 832; mixed mouillie, 827 to 829. Cheese—September and October make, 12 to 12½c, and easters at 11½ to 12c. Butter—choice creamery, 26 to 26½c, and fresh receipts at 24½ to 25½c. Eggs—Strictly new laid, 33c per dozen; selected cold storage stock, 28 to 30c; No. 1 candled at 21 to 25c per dozen.

UNITED STATES MARKETS.

Milwaukee, Feb. 22.—Wheat—No. 1 Northern, 81.18 to 81.19½ No. 2 Northern, 81.17 to 81.17½c (May, 81.17c); Rye No. 1, 81c; Corn—May, 68½c. Barley—Standard, 71½ to 72c.

Chicago, Feb. 22.—Wheat—Cash, No. 2 red, 81.21 to 81.26; No. 3 red, 81.18 to 81.21; No. 2 hard, 81.13½ to 81.14½c; No. 3 hard, 81.12½ to 81.13½c; No. 1 Northern, 81.16½ to 81.17½c; No. 2 Northern, 81.14½ to 81.15½c; No. 3 Spring, 81.12½ to 81.14. Corn—No. 2, 65c; No. 2 white, 66c; No. 2 yellow, 66c; No. 3, 63½ to 64½c; No. 3 white, 61 to 61½c; No. 3 yellow, 63½ to 64½c; No. 4, 59½ to 60½c; No. 4 white, 60½ to 61½c; No. 4 yellow, 60½ to 62c. Oats—No. 2, 49c; No. 2 white, 49½ to 50c; No. 3 white, 48 to 49c; No. 4 white, 47 to 48c; standard, 49 to 49½c.

LIVE STOCK MARKETS.

Montreal, Feb. 22.—Prime beevies 3 to over 6½c per pound; pretty good animals, 4½ to 5½c, and the common stock 3½ to 4½c per lb. Milk cows from \$30 to \$60 each; springers, \$30 to \$50 each. Calves, 4½ to 5c per lb. Sheep, about 5c, and lambs about 7c per lb. Good lots of fat hogs sold at 9½ to 9½c per lb.

Toronto, Feb. 22.—Everything was bought up for local killing. A few picked, well finished steers and heifers sold up to \$6.25. Straight loads of good butchers sold at \$5.00 to \$5.50; medium at \$5 to \$5.50; bulls were strong at \$4.50 to \$5.30, and butchers' cows at \$4.35 to \$5. Manitoba feeders realized up to \$4.65. Sheep and lambs were firm at recent advances. Hogs—Selects, \$8.25, f.o.b., and \$8.50 fed and watered.

The Canadian bank statement for January shows savings deposits at over \$505,000,000 and total deposits in Canada of \$746,631,000.

WOOD ALCOHOL'S VICTIMS

Father and His Two Sons--Tragedy Near Castor, Alberta.

A despatch from Stettler, Alberta, says: Wood alcohol has been the cause of a tragedy near Castor in which two lives have been lost and a third is in grave danger. The victims were a father and two sons, named Sleen, who are homesteaders, sixteen miles from Castor. They had been in the village last Saturday and purchased a quantity of wood alcohol from a chemist named Couch. After getting back to their

cabin they drank it and the elder son went to sleep, never to wake. The father afterwards died in great pain, but not before he managed to despatch the other boy, who was also suffering from the effects of the drug, for a doctor. The doctor retained him at the village, where he is now recovering, but the old man was dead when assistance reached his home. The police are investigating.

MILLION DOLLARS A MONTH

Increase in the Customs Revenue During Last Fiscal Year.

A despatch from Ottawa says: Canada's trade for January totalled \$51,500,102, an increase of \$12,722,627, or nearly thirty per cent. over the corresponding month of last year, and constituting a record for the month. For the first ten months of the present fiscal year the total trade has been \$363,986,78c, an increase of \$95,610,931, or about twenty per cent. The imports last month totalled \$30,253,852, an increase of \$7,140,225 over January 1909. Exports of domestic products totalled \$20,258,406, an increase of \$4,571,034. For the ten months im-

ports have totalled \$302,050,267, an increase of \$60,987,445. Exports of domestic products for the ten months totalled \$241,375,219, an increase of \$31,104,709. Of this increase, about \$16,000,000 was in exports of agricultural products, and seven and a half millions in exports of the forest. Exports of manufacture show an increase of nearly two millions. The customs revenue for the month was \$1,603,402, an increase of \$944,037. For ten months the customs revenue has been \$18,692,459, an increase of \$10,361,341, or a little over a million a month.

THE RABIES EPIDEMIC.

Local Districts Call on Provincial Board of Health for Assistance.

A despatch from Toronto says: The epidemic of rabies is assuming serious proportions, according to reports to the Provincial Health Department on Thursday, which will be transmitted to the Federal department. Isaac Tetro, a farmer in West Elgin, had a fine bull and two horses bitten by a dog running wild the other day. On Wednesday the bull developed hydrophobia, and had to be destroyed. The two horses are now under treatment, and it is feared that they, too, will have to be shot. The Township Council of Stephen, in the county of Huron, held a special session on Thursday to devise means for coping with the alarming conditions in their locality. Several mad dogs have been killed and others got away. Many cattle have been bitten.

EGYPT'S PREMIER SHOT.

Seriously Wounded by a Student at Cairo.

A despatch from Cairo, Egypt, says: Boutros Pacha Ghali, the Egyptian Premier and Minister of Foreign Affairs, was shot and seriously wounded on Sunday by a student, who was arrested. The student fired five shots, three of the bullets lodging in the Premier's body. Two of them, however, inflicted only superficial wounds. The bullets were extracted, and it is practically certain that the Premier will recover. The crime was entirely of a political nature, the would-be assassin being a Nationalist. He declared that his motive was a desire to avenge various acts of the Government, which the Nationalists attribute personally to Boutros Pacha.

COPPER REFINING.

New Process for Lower Grade Ore Invented at McGill.

A despatch from Montreal says: Members of the chemical staff of McGill and a New York chemist have been at work on the reduction of copper ore, and have succeeded in finding a new method of treating lower-grade ore. Up to the present no ore was profitable under four per cent. By the new process three per cent. ore will be profitable.

The tests were undertaken at the instance of a number of New York capitalists who have large holdings of copper which were of too low a grade to pay. Now they expect to start work on them immediately. It means a good deal to Canada, and there are many of the mines in Canada which could not be made to pay which will now pay handsomely.

NEARLY 9000 MILES RAILWAY.

Ontario Added to Her Railway Trackage by 260.23 Miles.

A despatch from Toronto says: According to the report of the minister of public works Ontario has now 8660.42 miles of railway, of which 260.23 was constructed during the past year. The Grand Trunk Pacific accounts for 188 of the new mileage, while the Algoma Central is constructing 110. New Ontario had 176 miles of new col-

INCREASED COST OF LIVING

Results of Special Investigations Carried Out by the Government.

A despatch from Ottawa says: With the current issue of The Labor Gazette the department begins the publication of the results of the special investigation, which has been in progress for some months, into the increase during the past few years in the cost of living. In subsequent issues there will be given statistical reviews of the trend of wholesale and retail prices during the past twenty years in Canada, with comparisons as to the trend of prices in other countries. The investigation will cover some 225 commodities in general use. This month a statistical statement is given as to the wholesale prices of animals and meats from 1890 to 1909. Averaging the prices for all

meats, the statement shows that during the year 1909 wholesale prices were approximately 48 per cent. higher than during the ten-year period from 1890 to 1899, and that, compared with 1906, they were fully 77 per cent. higher. The issue also contains a table showing the prices of thirty-four commodities which enter into cost of living at the more important centres of population throughout Canada. It is the intention of the department to publish quotations for a similar list of commodities from month to month in The Labor Gazette, thus making it possible to ascertain by comparison the changes in retail prices and the cost of living in the various parts of the Dominion from time to time.

streets, singing and cheering for a secret ballot. A conflict with the police immediately ensued. The police used their sabres and revolvers, charging several times, and the demonstrators replied with volleys of stones and bags of pepper. Four civilians seriously wounded were taken to the hospital, with one policeman, who had been stabbed through the lungs. These, however, constitute only a small proportion of those injured. Fighting continued at midnight in various quarters of the city.

TRADE AND BUSINESS

ADDRESS

A despatch from Toronto says: According to the report of the minister of public works Ontario has now 8660.42 miles of railway, of which 260.23 was constructed during the past year. The Grand Trunk Pacific accounts for 188 of the new mileage, while the Algoma Central is constructing 110. New Ontario had 146 miles of new colonization roads opened during the year. Eleven steel and 20 timber bridges were completed in the same part of the country, the largest being that near the scene of the Webbwood wreck, which has a single span of 200 feet. The development of 10,000 horse power will be provided for the storage dams constructed at the outlet of Dog Lake, near Fort William.

SIX COSTLY MICE.

Shipped From London to a Boston Professor.

A despatch from Boston says: Huddled up asleep in a small wooden box and appearing not unlike the white mice so common in this country, six little orange-colored rodents, valued at \$1,000.00 each, made up the most interesting consignment aboard the steamer Anglian, which arrived here from London on Wednesday. The animals are for a college professor in this city, who is to use them in experiments. The \$10,000 mice are a species of dormouse, or sleeping mouse, that live out of doors in the summer and remain torpid during most of the winter season. Their high value is caused by their great scarcity of numbers. They are about the size and build of a squirrel.

DRY-DOCK FOR MONTREAL.

Vickers-Maxim Company Will Invest Some Millions.

A despatch from Montreal says: A floating dry-dock for Montreal, capable of accommodating vessels of 20,000 tons, is the latest port equipment. It is understood that a considerable part of the capital for the dry-dock will be provided by the Vickers, Maxim and Vickers Company, one of the largest shipbuilding concerns in Great Britain, who will invest probably \$5,000,000 in the proposition, and will operate the dry-dock and the accompanying shipyard. The British firm do not confine their activities to shipbuilding, and it is expected that they will operate the Montreal plant during the winter months when navigation is at a standstill, for the output of railway supplies of various kinds.

Montreal's Salary List.

Civic Departments Overmanned, and Pay is on Generous Scale.

A despatch from Montreal says: Figures compiled at the City Hall go to show that Montreal has a salary list which yearly absorbs one million dollars, or one-sixth of her revenue. The last Council was very generous with salary increases, and also greatly over-manned the various departments. With a million dollars paid out in salaries and \$1,400,000 in interest charges it is little wonder that Montreal's finances were in a bad way. Mr. J. Guerin, brother of the Mayor, has been asked to fill temporarily the duties of Secretary to the Board of Control.

sentenced to prison terms ranging from fifteen to thirty years at New York, on Saturday.

GENERAL.

Soldiers with fixed bayonets attacked rioters in the Prussian town of Neumuenster.

The new Spanish Premier has declined to resign in spite of the protests of certain members of his party.

The discovery of a plot in favor of ex-President Castro has caused some excitement in Venezuela.

A fierce battle was fought in Nicaragua in which Gen. Vasquez, leader of the Government forces, was defeated.

ELEPHANTS RUN AMUCK.

Tossed Barrels About in a Winery, but Were Finally Cornered.

A despatch from San Francisco says: Three elephants owned by a showman broke away from a street parade on Thursday afternoon, and for 30 blocks ran amuck. With crowds scattering in pursuit, the elephants took to the sidewalks, and many persons had narrow escapes from being trampled on. Swerving into a butcher shop, the big beasts paused long enough to half wreck the place, then headed for a winery, where they tossed barrels and kegs about. They were finally cornered in a viaduct lot.

EIGHT-HOUR DAY BILL.

Mr. Dubreuil Says West is Making More Progress Than East.

A despatch from Ottawa says: Before the Common's Committee on Mr. Verville's bill in respect to an eight-hour day on public works, Mr. Victor Dubreuil, Fair Wage Officer of the Labor Department, gave evidence on Wednesday morning as to the conditions with respect to hours of employment in various parts of the country. He said that the tendency toward a reduction in the hours of labor was much more noticeable in the west than in the east. In Alberta and British Columbia several branches of the building trades were already working on an eight-hour basis. The committee decided to hear further evidence along this line at its next meeting.

BALLOT RIOTS SERIOUS.

Many Persons Wounded in German Disturbances.

A despatch from Frankfort-on-the-Main, Germany, says: Severe street fighting occurred late on Thursday night between the police and suffrage demonstrators, and a large number were wounded on both sides. The Socialists had organized five mass meetings, which passed off in good order, but crowds gathered later in the principal

379 Craig St. W., Montreal

The Federal Life Assurance Co. Of Canada

The Twenty-eighth Annual Meeting of the Shareholders of the Federal Life Assurance Company of Canada was held at the Company's Head Office, in Hamilton, on Tuesday, 15th February, 1910, at 2 p.m. Mr. David Dexter in the chair, Mr. W. H. Davis, Acting Secretary.

The Annual Report, as follows, was read and adopted, on motion of the President, Mr. Dexter, seconded by the Vice-President, Lieut.-Col. Kerns:

Your Directors have the honor to present the Report and Financial Statement of the Company for the year which closed 31st December, 1909, duly vouchered for by the Auditors.

The new business of the year consisted of two thousand six hundred applications for insurance, aggregating \$3,663,896.62, of which two thousand five hundred and one applications for \$5,504,235.00 were accepted.

As in previous years, the income of the Company shows a gratifying increase, and the assets of the Company have been increased by \$242,092.88, and have now reached \$3,843,949.56, exclusive of guarantee capital.

The Security for Policyholders, including guaranteed capital, amounted at the close of the year to \$4,513,649.52, and the liabilities for reserves and all outstanding claims, including \$20,000 set aside as a special addition to policy reserves, \$3,351,254.00, showing a surplus of \$1,162,695.52. Exclusive of un-called guarantee capital, the surplus to Policyholders was \$292,695.52.

Policies on one hundred and fifteen lives became claims through death, to the amount of \$200,466.67.

Including Cash Dividends and Dividends applied to the reduction of premiums, with annuities, the total payment to Policyholders amounted to \$247,274.42.

Careful attention has been given to the investment of the Company's funds. In first-class bonds, mortgage securities, and loans on the Company's policies, simply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business. The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the Directors for your approval show an advance of nearly ten per cent. in assets.

The assurances carried by the Company, now amount to \$21,049,222.31, upon which the Company holds reserves to the full amount required by law, and in addition thereto, a considerable surplus.

You are to be congratulated on the fact that the surplus over Capital and all Liabilities increased \$17,211.88 during the past year, from which a special addition of \$20,000 was made to policy reserves.

The field officers and agents of the Company are intelligent and loyal, and are entitled to much credit for their able representation of the Company's interests. The members of the office staff have also proved faithful to the Company's service.

Your Directors are pleased to be able to state that the business of the Company for the current year has been of a most satisfactory character, and that the outlook for the future is most encouraging.

DAVID DEXTER,

President and Managing Director.

AUDITORS' REPORT

To the President and Directors of the Federal Life Assurance Company:

Gentlemen.—We have carefully audited the books and records of your Company for the year ending 31st December last, and have certified to their accuracy.

The Cash and Journal Vouchers have been closely examined and agree with the entries recorded.

The Debentures, Bonds, etc. in the possession of the Company have been inspected, whilst those deposited with the Government have been verified by certificate, the total agreeing with the amount as shown in the Statement of Assets.

The accompanying Statement, viz., Revenue and Expenditure, Assets and Liabilities, shows the result of the year's operations and also the financial position of the Company.

Respectfully submitted,

CHARLES STUE, C. A. } Auditors.

C. S. SCOTT, F. C. A. } Auditors.

Hamilton, 1st February, 1910.

All the retiring Directors were re-elected, as follows: M. H. Alkins, M.D., David Dexter, Hon. Geo. E. Foster, Hon. J. M. Gibson, T. C. Haslett, K.C., Lieut.-Col. Wm. Kerns, John G. Scott, A. E. Buss, M.A., John Wakefield, D.D., and A. Woolverton, M.D.

At a subsequent meeting of the Directors the following officers were re-elected: David Dexter, President and Managing Director; Lieut.-Col. William Kerns and T. C. Haslett, K.C., Vice-Presidents; Dr. A. Woolverton, Medical Director.

SPRING BOOTS For Men.

Perhaps a little early to talk Spring Boots, still there are a great many advantages in buying now. You get a full range of sizes in each style and the prices are lower than we will be able to quote later on. The leather market is soaring every day, and our Spring Boots were all bought before the advance.

Here's a Few of Them :

Gents' Patent Cotskin Blucher Style Boots, with light or heavy Goodyear Welted Soles, on two very popular lasts **\$4.00**

Other Patents at **\$3.00, \$3.50, up to \$5.00**

Gents' Tan or Black Calfskin Boots, all the new shapes and styles. Popular prices **\$3, \$3.50 & \$4**

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

On page one of this issue will be found an item in reference to the operation of the fire alarm boxes. Cut it out and stick it up where it will be seen often, then if necessary you will understand how to operate them.

At the last session of the town council the clerk was authorized to draft a resolution and present it to the Minister of Public Works at Ottawa asking that the town clock on the post office be illuminated. This is a decidedly good move and there is no reason why the request should not be granted, particularly as nearly all the towns and cities along the line are enjoying the conveniences of an illuminated time piece.

Morrison of Queen's University will deliver a lecture on "Ireland and the Irish Question." The lecture is open for the public, — Entrance free and every one welcome.

Died in the Snow.

William Gilchrist a well known former resident of Morven, was found on Wednesday morning frozen to death on the porch of the school house near Morven. He was around town in the afternoon and had been imbibing pretty freely and about seven o'clock started to walk to his brother's home at Morven. Deceased was sixty-seven years of age, a carpenter by trade, and spent the summer in Watertown, returning here last fall to spend the winter. The remains were taken to Messrs. Hamby & Ming's undertaking rooms to be prepared for burial.

Two Houses Destroyed.

On Wednesday morning fire was discovered in one of the Cartwright houses in South Napanee near the G. T. R. tracks. The fire originated in the house occupied by Mr. Wilson on one side the furniture of Mr. Amos Smith being stored in the other half. The flames then spread to the adjoining house occupied by Messrs. King, and Loney. As both houses were of frame construction the fire quickly gained control and after a short hot blaze both houses were burned to the ground. None of the tenants were able to save much of their household goods and as none had any insurance the loss is a heavy one for them. The

road. He was about seventy years of age and leaves a sister, Mrs. E. J. Madden, Strathcona, and several brothers.

Friday evening last a fast and clean game of hockey was played at Diamond's rink between a team from Picton and the N. C. I. hockey team. The N. C. I. boys won by a score of 5-3. The visitors played a fast, clean game, but were simply outclassed, the boys from the N. C. I. being able to skate rings around them and the Picton goal tender was kept on his mettle all the time trying to stop the numerous shots.

Don't forget the Anniversary Services in Trinity Church, Sunday, March 6, and Concert Monday, Mar. 7th.

Mrs. B. C. Lloyd, mother of Mrs. A. W. Caton, died on Monday at the home of her daughter, aged seventy-four years. For the past three weeks she has been lingering between life and death, and though she had the best medical advice and most careful nursing her spirit took its flight. Deceased was beloved by her many friends for her gentleness of character and amiable disposition and will be missed by friends and neighbors. Mrs. Caton is her only child. The funeral took place on Wednesday from the residence of Mr. and Mrs. Caton to Newburgh vault.

John Allen, J. P., Marlbank, passed away on Saturday. The deceased was in his seventy-eighth year and was a son of the late Dr. James Allan. He was the eldest of eight sons, and one of a family of thirteen children. Two brothers, A. D. Allan, Marlbank, and R. B. Allen, Napanee, and three sisters, Mrs. J. Sanderson, Carman, Mrs. Rev. Sanderson, Madoc, and Mrs. Nelson Burley, Roslin, survive. Two children also survive, Mrs. Dr. Mathers, of Tweed, and Nelson Allan, Carman, Man, who is at present on a visit to his parents. Deceased was reeve of Hungerford township for several years, a prominent temperance worker, a member of the Methodist church. He lived all his long and useful life in Marlbank and was widely known and very highly respected. His sorrowing widow and children have the sympathy of a large circle of friends in their hour of trouble. The funeral took place on Monday.

Jessop's Effervescent Saline before breakfast will make you feel better. Try it.

Nineteen counties in the Province have adopted the Good Roads system and planned the improvement of three thousand miles of their leading highways. The Good Roads Association of Ontario consider the time favorable for a general advance in the construction of good roads throughout the whole Province. With this in view they are arranging for a widely representative convention to be held in Toronto on March 2nd, 3rd, and 4th. Efforts are being made to secure the attendance of members not only of County Councils but from the township bodies, and all other associations that are interested in improving the roads of the country, such as the Farmers' Institute, Agricultural Societies, Fair Associations, the various live stock associations, fruit growers, and others. The movement is spreading also to the towns and cities. The programme will provide for a valuable series of addresses from superintendents of county road systems already in operation, explaining the method of designating roads, the machinery and material used, the cost, and how the money is raised. Experts, in addition, are being secured from New York, Pennsylvania, Massachusetts, and other states where the finest roads in America have been built up. After a thorough discussion, it is proposed to decide upon some policy that will include the most valuable points of all these systems. During the convention a huge delegation will wait upon the Provincial government to consult with it as to future assistance. As over five hundred delegates are expected to attend, single fares will probably be secured. Communications should be sent to the Secretary of the Ontario Good Roads Association, at Whitby.

T. R. tracks. The fire originated in the house occupied by Mr. Wilson on one side the furniture of Mr. Amos Smith being stored in the other half. The flames then spread to the adjoining house occupied by Messrs. King and Loney. As both houses were of frame construction the fire quickly gained control and after a short hot blaze both houses were burned to the ground. None of the tenants were able to save much of their household goods and as none had any insurance the loss is a heavy one for them. The firemen were early on the scene and laid a line of hose from the Gibbard factory across the ice and up the hill and were able to save the houses on the opposite side of the road from destruction.

Kodaks and supplies at Wallace's Drug Store, Napanee. Mail orders received promptly attention.

Obituary.

Irvine Parks, county treasurer of Lennox and Addington, passed away early Sunday morning after a few weeks' illness of heart trouble. A week previous to his demise he had a slight stroke but rallied the next day and was apparently improving. Mr. Parks was well known and respected throughout the county, a staunch reformer and a prominent member and treasurer of the Western Methodist church. Deceased had been county treasurer for about fifteen years and his knowledge of county affairs rendered his services particularly valuable to the county. Before accepting the office of treasurer he was a prosperous farmer in North Fredericksburg. His wife pre-deceased him about one year ago. One step-daughter, Mrs. Ezra Huffman, Hay Bay, is the only surviving relative. The funeral took place on Tuesday from his late residence. Services were conducted in the Western Church by Rev. W. H. Emsley and the remains placed in the Eastern cemetery vault. Nearly all the members of the county council and officials were present to attend the funeral. The flag on the court house was flying at half mast out of respect to the deceased official.

Household Dyeing

Can be done with greatest satisfaction by using Dyola Dyes, they are less trouble than any other and give the best results. Get them at Jessop's Pharmacy, 3 packages 25c.

Provisional Secretary.

Children Cry FOR FLETCHER'S CASTORIA

Only 3 dozen 75c. Lanterns left to be
sold at 49c. None sold after March 1st.
11 dozen sold in one day at

BOYLE & SON'S.

One of the first persons to attempt to get
mail out of the Winnipeg post office since
the new Sunday closing rule went into ef-
fect was a local minister who had forgotten
to call for his Sunday school literature on
Saturday.

In January 6,638 immigrants entered
Canada, as compared with 4,097 in January,
1909. During the ten months ending Jan-
uary 31st, 1910, the total immigration was
165,567, compared with 125,653 during the
same period of the preceding fiscal year.

G. H. Davy, wireless operator on the
government steamer *Quadrat* at British Col-
umbia is suffering from ptomaine poisoning
contracted through eating canned peaches.
He is now out of all danger. Harry is one
of the best known operators on the coast
and is a former Napanean.

A despatch from Mexico says Mr. Geo.
I. Ham, who was president of the United
States Banking Company, which went into
the hands of a receiver several weeks ago
had been arrested on a charge of breach of
trust. It is charged that mining stocks
given as security for loans is missing.

Don't forget the Anniversary Services in Trinity Church, Sunday, March 6, and Concert Monday, Mar- 7th.

The Peterboro Board of Trade has under-
taken to raise \$2000 by subscription to
maintain a commissioner of industry of the
city. If the board raises \$2000, the city
council will make a grant of \$2000. Peter-
boro intends making a big effort to secure
factories this year. The rate of taxation
this year is 22 mills, last year it was 19.

The executive committee of Belleville
city council has recommended that the
council amend the by-law governing dogs
so as to compel all dogs in the city to be
muzzled, and the muzzles to be of metal.
Although there is no rabies or any sym-
ptoms in the city or vicinity, the step is
being taken as a precaution to prevent
same.

Dr. de Van's French Female Pills—the Wife's Friend.

A reliable regulator; never fails. While
these pills are exceedingly powerful in
regulating the generative portion of the
female system, they are strictly safe to
use. Refuse all ch. ap. imitations. Dr. de
Van's are sold at \$5.00 a box, or three for
\$10.00. Mailed to any address. The
Se. Bell Dug Co., St. Catharines, Ont.

"The Man of Destiny."

A very interesting pen picture of
Napoleon is drawn by John Cam
Hobhouse, afterward Lord Broun-
ton, in his "Recollections of a Long
Life." He writes:

"I had for some time a most com-
plete opportunity of contemplating
this extraordinary being. His face
is of a deadly pale, his jaws over-
hanging, but not so much as I had
heard. His hair is short, of a dark-
dusky brown. He generally stood with
his hands knit behind him or folded
before him and three or four times
took snuff out of a plain brown box.
Once he looked at his watch, which,
by the way, had a gold face and, I
think, a brown hair chain, like an
English one. His teeth seemed regu-
lar, but not clean. He very seldom
spoke, but when he did smiled in
some sort agreeably. He looked about
him, not knitting but joining his eye-
brows. As the front of each regiment
passed he put up the first finger of
his left hand quickly to his hat to
salute, but did not move his head or
hat. He had an air of sedate impa-
tience."

A Circular Rainbow.

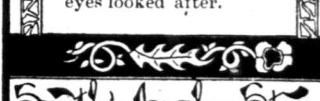

A member of a party who made an
ascent of Finsterrehorn some years
ago thus described a novel sight
which delighted the tired climbers.
The day we mounted the Finsterre-
horn we were treated to the rare sight
of a circular rainbow, the phenome-
non lasting nearly half an hour and
forming a complete circle. There
were heavy clouds lying some 4,000
feet below on the Aar glacier, and it
was on these that the beautiful, bril-
liantly colored ring lay. A second
circle was also visible. We were near
the summit of the peak when the first
of the party observed it, and from
that point the face of the mountain
on the Grimsel side is almost perpen-
dicular, giving us a splendid view.

**Fitted all
Around**

Our Glasses fit the
eyes, our frames fit the
face, and our prices fit
the purse, three important
points. If you think
your eyes are not just
